BRING REE PLAKS TO TRIAL

Senator J. William Fulbright's observation that "I've never heard so much lying in my life" cannot be taken as merely a passing characterization of what has been going on in the investigation of the RFC carried on by the senate banking and currency subcommittee.

If the senator's opinion is correct, the proceedings should then pass into the hands of the Department of Justice.

The law branch of the government is, however, the executive department which is heavily involved in the whole messy RFC affair.

A presidential aide has been accused of dominating RFC directors and has refused to answer the charges. The president has called the prior report of the Fulbright committee "silly," a remark which he no doubt wishes he could recall.

Under the circumstances it will take courage for the attorney general and his associates to proceed with dispatch and diligence with the prosecution of any witness before the senate committee against whom the charge of perjury may lie.

He should display that courage. The Truman administration in its career since 1945 has shrugged off the grain speculations of Dr. Wallace Graham, the president's physician. It is it shrugging off the conduct of Gen. Harry Vaughan as the friend of the fixer, Johnny Myerson. It has shrugged off the activities of Daniel Dawson. It has shrugged off the milk out incident. It should not be allowed to stand knee-deep in such practices without being called to account. A

White House connection should not mean that those who process it can abandon decent conduct with impunity. Houston Chronicle.

It would seem clear that the only thing remaining for the Fulbright committee to do is to hold open hearings and examine under subpoena and under oath some of the individuals whose names have been brought into the investigation of the RFC.

Any such public inquiry should include testimony from Daniel Dawson, presidential aide. The White House functionary, has so far refused to comment upon the Fulbright report. He has not asked to have an opportunity to testify. That does not give the appearance of one who is anxious to appear a slander upon his name.

If Mr. Dawson is unwilling to come forward in any other way he should be subpoenaed. He might then be instructed by the president not to appear, but we do not believe that Mr. Truman would go to this extent to shield his associate. If he has confidence in Mr. Dawson, as he says, he should be glad to have him testify under oath.

It might be well for the Fulbright committee, in view of charges which have been made, to ask Mrs. E. Merle Young, presidential stenographer, to testify as to the truth or falsity of the charge that she was presented with an expensive fur coat by one seeking a loan from the RFC.

It seems safe to say that the stench which emanates from RFC operations as the result of the Fulbright report is not going to be dispelled by the president's use of the description "silly." A more drastic treatment is needed and a public examination of all the facts is clearly indicated. Houston Chronicle.

War has brought tremendous pressure for expansion of the Federal bureaucracy. Government cannot expand indefinitely without finally and permanently destroying the constitutional checks and balances that protect the people from tyranny. In a time of military emergency restraints against business as usual are accepted by every patriotic citizen. Likewise, restraints against politics as usual

Instead, high public officials have been sounding off unimpairedly in favor of dictatorial regulation and unbridled taxation of all citizens, while studiously repressing the slightest reticence in useless political waste and extravagance. They say not a word about dropping non-essential activities of the Federal government—instead they increase them.
