MR. TRUMAN'S MESSAGE

President Truman proposed, in his state of the Union message, to put the government further into the lives of all Americans and especially into the operations of American business. He proposed to wipe out most of the legislative actions of the Eightieth Congress affecting the national economy.

He proposed many plans which will greatly increase the cost of government but will not increase federal taxes. He asked for increase in the cost of production capacity where necessary. He asked for increase in the cost of production capacity where necessary.

REPUBLICANS AT CROSSROADS

Republican National Chairman Hugh Scott Jr., sounds the right keynote in his letter to the 25,000 party leaders throughout the country. He tells them that the Republican party must not imitate the Democratic party by adopting a platform of left-wing measures.

A course in which both parties promote the idea of an all-powerful state could be potentially disastrous. Stop by and fill up with

From where I sit... by Joe Marsh

We Both Won This One
I saw my top the other morning when I discovered a shirt I'd put on had two buttons missing.

From where I sit (as I told the missus that evening), a lot of us sometimes get too worked up over little things. Little differences of opinion or taste. One person prefers beer or ale, another prefers cider or lemonade. But why criticize the other fellow just because his tastes aren't the same as ours?

Politically speaking, I guess this will be another year of the donkey here. Internationally, I hope it will be the year of the dove. As far as food prices are concerned, I'd like it to be the year of the steer. Or maybe the year of the turtle dove, so all our nice single girls can get married.

New Markets are Born in a Test Tube

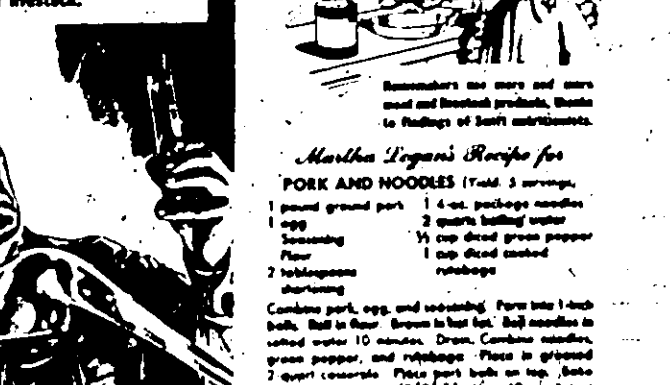

From livestock country to city center, science blazes the trail for the livestock meat industry. Among these trail-blazers are 400 trained personnel in the Swift Research Laboratories and test kitchens. Pioneer-scientists, they develop new meat products—find new uses for more and more livestock by-products. Scientist-scientists, they create new markets—better values for your livestock.

Yes, their work means money to you... millions! The average annual commercial slaughter for the last ten years was over 284 million cattle and calves, nearly 60 million hogs, and over 22 million sheep and lambs. That's a lot of meat—and it's a lot of by-products, too! Corn, pigskins and sheepskins, by the millions, for everyday leather goods. Well over 10 million pounds of pulled wool annually for cloth and clothing. Thousands of tanned skins for shoes and linings. Carcasses of animal foods. Tons of hair for upholstery. The list is almost endless.

Research found how to derive life-saving pharmaceuticals from animal by-products. Here numbers are important. For example, tiny glands from many thousands of animals must be moved to produce one pound of adrenalin, powerful heart stimulant. To yield one pound of crystalline insulin, vital in the treatment of diabetes, the pancreatic glands of 20,000 cattle are needed. Important, too, is albumin, tuberculin "detectors" recovered from cattle blood—and many more beneficial, all-important medicinal products derived from animal slaughter.

Now recent research has developed an entirely new line of important chemicals from fatty acids. One chemical from fat makes clothing water-repellent. Another is a flotation agent, useful in the separation of phosphates for fertilizers. Another prolongs the life of synthetic tires by causing them to run cooler. And detergents, "soap substitutes," have been recovered for use with hard water in the home and industry. So the list grows, from day to day.

New products are developed, new uses are found for meat and by-products in Swift's Food Research Laboratories. Thus our "scientist-scientists" help you find wider outlets for your livestock.

Many million head of livestock are marketed annually. Demand for these animals has been increased by Swift research.

Business Must Serve
As you look about your own neighborhood you'll find some men who are sure to be the community, others who add nothing to community life. These good citizens may be large operators, but they are not the community.

This same principle holds true in business. The business that performs worthwhile service to the community is an asset, whether it be a local concern or a big national organization.

In our livestock meat industry both large and small meat packing plants are essential. Two-thirds of our country's livestock is raised and fed and of the Mississippi, where the great grizzlies and grizzlies are... Two-thirds of the meat is eaten and of the Mississippi, where the great grizzlies and grizzlies are...

Swift & Company has grown with the expansion of the United States in the past 65 years. That's because we perform service of value to the people of America—to farmers, ranchers, meat dealers, and consumers of meats. We have to be efficient to provide these services. Meat packers have applied to most products the economies of mass-production and mass-marketing. We have developed one of the lowest cost food distributing systems in the nation. By saving by-products and by reducing waste, we increase the value of producers' livestock.

With all our friends on the farms and ranches of America, we of Swift and our sincere best wishes for a happy, plentiful and prosperous New Year.

TRUMAN'S ECONOMIC REPORT

The security of our national economy rests upon two main pillars: the security of our agriculture and the security of our industry. The security of our agriculture rests upon the security of our food supply. The security of our industry rests upon the security of our raw materials.

HOPES TO TAKE IN WASH, PEDDLE ICE FOR ODD REVENUE

Washington, January 10.—By taking in washing, peddling ice and turning out in winter months, the police hope to get some of the \$41,000,000 it is going to take to run the city's new police department.

LABOR NEEDS TO DICTATE

It is not going to be easy for the administration and the Democratic majority in Congress to live with the leaders of organized labor. The labor leaders have already indicated that they want things done their way and in no other way. The labor leaders have already indicated that they want things done their way and in no other way.

Crossbred or Fine-Wool?

By A. C. Egan
Utah State Agricultural College, Logan, Utah
Crossbreeding in Western Range herds has long been a discussion point among operators. The advantages of the crossbred over fine-wool are:

1) Crossbred ewes are better mothers; 2) they are more prolific breeders; 3) they produce lighter shrinkage wool; 4) they produce high percentage combing wool; 5) they produce better mutton lambs; 6) they are better rustlers on the range; and 7) they are larger sheep.

MORE INTEREST PK [HEALTO.] [uncertain]

Every citizen of Texas should be greatly [Interested] [uncertain] in the over-all [hgalth] [uncertain] picture in the state as indicated by the morbidity report just released by Dr. [George] [uncertain] we Cox, state health officer, showing the years [totala] [uncertain] on communicable diseases.

Comparing the 1944 [figurea] [uncertain] with the [totale] [uncertain] of 1047, a great reduction is shown in some of the major health hazards. For instance, in 1047 there were 1125 caeca of diphtheria, while in 1948 the total had dropped to [Ure] [uncertain] This was 924 casa too [nianty.] [uncertain] since none of them [neéod] [uncertain] have [acurea] [uncertain] if the [perafis] [uncertain] had been immunized. This marne statement [applica] [uncertain] to [emallpox.] [uncertain] in which the [tetal] [uncertain] dropped from 1% cases to 4 Vaccinations would have prevented the incidence of even one case of [amalipox, Typhoid] [uncertain] fever remained at a comparative [ptandatill.] [uncertain] with 317 [caace] [uncertain] being reported in 3947 and 318 in the past [yrar.] [uncertain] These [hyphold] [uncertain] cases could also have been [pre] [uncertain] vented by immunization.

It was not a real test of comparative [atrenth] [uncertain] of conservative and radical [forera] [uncertain] when the house of repro. [aentatives woted] [uncertain] to change its rules by a vote of 27h to Lit. [It] [uncertain] did not mean that more than one-third of the Republicans in the house favor the Truman legislative program or that only thirty-five Democrats oppose it. The issue [waa] [uncertain] whether the [commitce] [uncertain]

livestock country blazes the [trailfor] [uncertain] a [thrivi] [uncertain] try. Among these trail-bla:

contention that it will agree to the detention of certain phase of the [Taft-Hartley] [uncertain] act, there je no valid [reaaun] [uncertain] for its [inalatence] [uncertain] that the Wagner act without amendment must be reenacts) first, There are many persons who be" jreve-tirat la [ons] [uncertain] of the Taft-Hartley act [Kouta] [uncertain] t be retained. There are few who now believe that the Wagher [ect] [uncertain] as it stood should be the law) ok the lam again" even" Tor a [ahr] [uncertain] while.

Union tabor should peeve [ita] [uncertain] good faith [bry] [uncertain] being agreeable to the writing of a new [Taber] [uncertain] law as a substitute for the Taft-Hartley [dct.] [uncertain] Otherwine it may be justly [ateused] [uncertain] of [trylng] [uncertain] to lake over the processes of [government.—Houston Chronicle.] [uncertain] L

GOVERNMENT COSTS AND

INFLATION.

The presidents spending program invites bankruptcy," according to

Charles A. Halleck Rep.) of Rap 0 There may be some polili-) cal motive in Representative [Hallecks] [uncertain] outer but this does [nol] [uncertain] mean [that]. [uncertain] it ln not true, A retrospective glance at federal spoons id interesting.

Defore World War 1 Uncle Sam wan spending about a billion annually. He upped this to a peak of [twentyodd] [uncertain] billions ta meet the World War J emergency and then dropped back to a peacetime average of about three billions [duting] [uncertain] the twenties. New Deal spending during the thirties averaged about twice as much and then went to [prak] [uncertain] of ninety billions to meet the t of World War II. This [waa] [uncertain] really dirty business but we assured [ourtelyes] [uncertain] that, [afler] [uncertain] the war, the [tudgyt] [uncertain] could be reduced drastically. [Mut weve] [uncertain] average bouts forty [Mltions] [uncertain] since the war.

Nuw the [algnificant] [uncertain] thing about the! Presidents new proposals p that

their adoption will [meen] [uncertain] a permanent national budget of st least forty-five billions. That i about 20 per cent of [wut] [uncertain] present greatly inflated national income if acute and local taxes are algal, we can [cakulate] [uncertain] 35 to. 30 per cent. We are wt the danger mark [alyeudy. A"] [uncertain] small: [Wecline] [uncertain] to national income would be disastrous. [There] [uncertain] ie another bad aspect of the [leng] [uncertain] trend. The [Federal] [uncertain] government has been buying more and more things and services with mote and more dol- lars, that have lees an leas real value. [Thie] [uncertain] declining [valoe] [uncertain] is the beat sign im the world that we are spending too much, [Ic] [uncertain] ie just ms true as on [algebrew eyualion] [uncertain] 4

History gives ue numberless in stances of [cuunteies] [uncertain] that have gone Urrough exactly [thie] [uncertain] process. But stone [rycwnt] [uncertain] public polls indicate that we dunt teed history any more, or teach it In [pur wxhools.—] [uncertain] Dallas News
