PRESIDENT'S PROGRAM FAILS.

The defeat of President Truman's civil rights program has been in the cards all along. This comes about partly from that peculiar political phenomenon, the almost solid South's insistence on voting for party label and acting on party principle. In part it has come about from the president's campaign strategy. While he was rather forthright in his declaration of a platform, he undoubtedly made some secret commitments to labor and other minority blocs. It would not be quite fair to say that he won by playing both ends against the middle, but it is a fact that he won because circumstances played both ends against the middle to his benefit.

There is another weakness in President Truman's campaign for his program. A good many even of those who are openly committed to his program will not be heard from if it fails for reasons beyond their control. This is true of those southern Democrats who are going down the line with Truman. On the other hand, there are some Republicans from radical northern districts who would not mind seeing Truman fail to put his program over—again in event their own record is clear with their constituents.

There is more hypocrisy in politics at this level today than ever before. The idea back of our jobs is that each party has distinguished itself ideologically while trying to stick to the label and a single candidate at election time. The instance of southern Democrats teaming with northern Republicans is only the most noteworthy of a number of confusing situations that have arisen. This situation will continue until such time as there is a reversion of party support around two ideological poles.

President Truman had the same trouble with the last congress that he is having with this one. About

"We get faster handling of larger payloads"

...with our new 145-horsepower

Ford Model F-7 BIG JOBS!"

THE ACTUAL operation cost for our fleet of Ford F-7

Big Jobs is the same as the two-ton trucks they

replaced, but we get faster handling of larger payloads,"

reports Mr. H. B. McQuinn of Beaumont, Texas.

The new 145-horsepower Ford Model F-7 Big Jobs

are more versatile, more capable. They are far superior

to the two-ton trucks.

Sensational reports on the new F-7 and F-8 Ford Big

Jobs are coming in from everywhere. Men who know

trucks claim 6,000 miles per month for months on end,

with no time out... gross loads of 50,000 lbs... power

that leaves other trucks eating dust... passenger-car type

of driving ease and comfort... gasoline economy that

even smaller trucks can't equal... a caution on comparable

runs. Come in and let us give you more facts on the Mr.
