PUBLIC LAND FOR SALE IS SMALL

Austin, May 1.—State Land Commissioner, Bascom Giles, states there is still public land for sale in Texas. However, not much of it, as Texas measure land. Less than one percent of the once colossal public domain is available to high bidders as the land acreage has dwindled to a total of 1,025,975.70 acres. (The total acreage of the state is 172,857,000.) The unsold land includes 40,550 acres in Cherokee county.

Not all of the million acres can be purchased, Giles explains. The domain is administered by the School Land Board, of which Giles is chairman. Section called to make payroll and routine bills payable when due by City Secretary Dudley Woodson.

When there is sufficient demand, the School Land Board authorizes the sale of specified tracts. A public sale is advertised and information about the tracts supplied by the General Land Office upon request.

Sale is by sealed bids. The high bidder, if conforming with all regulations, is the new owner.

The terms are 20 per cent down with 40 years to retire the balance at five per cent interest. The Permanent School Fund retains one-tenth free royalty in all oil production and one-eighth free royalty in sulphur production.

LINDBERGH SERVES.

Col. Charles A. Lindbergh was treated pretty shabby during the war. Notwithstanding the cold shoulder, Lindbergh served and research, der turned to him by the Roosevelt administration, he went ahead and served his country in such ways as were open to him. It now develops that his work has been outstanding. In some details it has been of such vital consequence as to put it in the top secret classification.

Lindbergh's estimate of the air might of Germany was so factual and so accurate that Mr. Roosevelt evidently resolved to have none of him. Those who did serve in World War I on European fronts know that Lindbergh did not exaggerate. He did underestimate the power of the British Royal Air Force to stand hitler off until American factories could build a fabulous number of planes. But that was because the slender force of British lads did the impossible before they died.

When the full story of the Lone Eagle is written, it will recognize him as a truly great man. America owes a lot to Charles A. Lindbergh. What Charles A. Lindbergh owed to the United States has been paid—quintly and in full.—Dallas News.
