It is possible, therefore, that pro- [duction] [uncertain] in the [ateel] [uncertain] industry will be [ahut] [uncertain] down at the em of the month.

[Thin] [uncertain] would be a blow to the economy but it would be an equally severe blow for this large segment of our industrial life to grant a major fourth-pound wage increase, fur that would mean that the price level in [heary] [uncertain] goods could not he reduced [itn] [uncertain] foreseeable [future.—Houston] [uncertain] Chroni- [cle,] [uncertain]

EMPLOYMENT OUTLOOK.

Statistics show that employment is gradually falling off. This of course, is an important factor in connection with wages. When an idle man ls standing behind an employed man waiting for his job, two things hap-

First, the employed man works [rder] [uncertain] and [doca] [uncertain] better days work:

and secondly, he is not going to ask for any wage increase. People are [spendnig] [uncertain] leas money due to the fact they have been using up [thelr] [uncertain] war savings. This causes leas demand for goods, which in [turr,] [uncertain] causes em- [ployers] [uncertain] to lay off more [belp.] [uncertain] Then the purchasing is still lesa. Hence, the vicious circle which hae been api- reading upward for the past few henry will now begin to spiral down just as rapidly.
