RAID ON RECLAMATION FUNDS REVEALED

**\$993,307,000
FOR 17 STATES**

Library of Congress tabulation shows that total government appropriations for building reclamation projects in the 17 western reclamation states amounted to \$993,307,000 during the entire 11 year period from 1937 through 1947.

**\$738,000,000
FOR ONE STATE**

Arizona is making Congressional bid for one irrigation project costing a minimum of \$738,000,000 for initial development only. Additional tunnels and dams would raise total project cost to an estimated \$1,500,000,000.

Backers of western reclamation development have expressed grave concern over possible fate of numerous state programs if Arizona's request for a huge irrigation project should be granted. They point out that this proposal gives Arizona the lion's

share of all available funds. To meet such a threat, a fight is being waged behind the scenes in Congress over Senate Bill 75 and House Resolution 934. These are the controversial bills calling for the largest reclamation appropriation ever made to a single

state. The reclamation states involved in this vital matter are: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

STEAMER SAILED

TRINITY IN 1850.

CLIPPING REVEALS

Navigation of the Trinity river was a fact in the 1850's. Mrs. John E. Price of 218 Richmond road said in a letter to The Houston Post.

And Mrs. Price sent along proof—an old newspaper clipping bearing reproduction of a steamboat advertisement that appeared in Dallas papers in 1857.

The ad includes a picture of the steamboat, called the Weishman and described as "a fast running, light draught steamer." The ad said passengers could be had "for Dallas county and all intermediate landings." Captain R. D. Aprie piloted the steamer.

Mrs. Price's letter:

"I read with interest the article written by M. H. Jacobs, Washington correspondent, regarding the 'Trinity Canal Project—100-year-Old Dream Coming True,' which was published in your Houston Post Thursday, Oct. 9.

"Yesterday, as I was delving into an old scrapbook which belongs to an old aunt of mine, I found this picture of an old steamboat called the Weishman, which (according to the story) regularly plied the Trinity river in the 50's."

"I am taking the liberty of sending this to you for I think it is most interesting."

The above clipping, interesting because of its historic nature, was sent to the Courier on Monday of this week by Mrs. John A. McConnell of Dallas.

RULES OF CONTEST

Community educational exhibits at the Houston County Fair, September 19-24, will be under the direction of Mrs. Mae K. Sallas, Latex high school instructor of home-making.

She announces that organized groups or community leaders are urged to begin their plans now for their exhibit at the fair. "Choose your theme along the line of education. Last year one group emphasized the adage: 'As the twig is bent so is the tree inclined.' This quotation was the best subject of the entire community exhibit. Another community carried out the theme of their local community organization which included education, recreation and all phases of community improvement."

Mrs. Sallas has made a number of contacts with leaders in the various sections of the county and finds that interest and enthusiasm are very high this year. Prizes are valuable, thus insuring outstanding originality of thought for the project.

Judging will be made on the basis of educational value of the exhibit, originality of thought and neatness in arrangement, she said. "Choose your subject early and list it and the name of the community or organization with me, the chairman of this exhibit. Last year subject was easily grasped and see that all portions of the exhibit carry out the central theme," Mrs. Sallas explains.
