CORN CROP CONTROL IN 1950 INDICATED BY BIG 1949 YIELD

Washington, September 9.—The government Friday estimated this year's corn crop at 3,525,741,000 bushels—a figure which virtually assures federal controls next year to hold down production.

A crop of this size would be far in excess of prospective needs and would add to a big surplus of the livestock feed grain resulting from last year's record of 3,550,000,000 bushels.

While no decision is expected until later in the year, controls probably would be limited to acreage planting, allotments aimed at limiting the 1950 crop to about 3,000,000,000 bushels. Friday's estimate—by the Agriculture Department's Crop Reporting Board—is slightly over 12,000,000 bushels less than was forecast a month ago. Inasmuch as the growing season has passed its peak, the new estimate is expected to be fairly close to the final figure.

From the consumer standpoint, the indicated bumper crop should assure plentiful supplies of feed for production of meat, dairy and poultry products well into 1951. But it may create a big price support and storage problem for the government.

The crop board said the total output of all crops, based on current estimates, is virtually the same as forecast a month ago—that is, the second largest of record.

The wheat estimate was virtually unchanged from a month ago, when the fourth largest crop was estimated.

EXAMINATIONS FOR SUBSTITUTE CLERK

Examinations are announced for position of substitute clerk for various post offices where employees do not have civil service status or where vacancies exist. Mr. C. M. McCarty, secretary, Board of Civil Service Examinations, Post Office, Crockett, Texas, states that he will hold examinations for the Lovelady post office. The examinations for the above post office will be held at Crockett, Texas, on October 1, 1949, commencing at 8:30 a. m. Applicants to be examined must actually reside within the delivery of the post office at which they desire employment or be bona fide residents of the county.

One May Be Too Many

President Truman likes to say things that are pleasing. He says it is not true that most young people are going to hell, and he states a fact in so saying. But some young people, if they do not mend their ways, are possessed of a tendency to drift that way. Following the lines of least resistance—indulging in selfish ambitions and pleasures—along the highway leading toward a life of crime, they are heading for a life of crime.

Demolishing Wives Unhappy.

The man who caters to his wife's every whim, lets her make all the decisions and, in general, permits her to wear the family pants, shouldn't be surprised if she is unhappy with it all.

"If the man is indecisive—if he is for 'peace at any price,' he will not only never know peace, but he will surely create a spoiled, dominating, and essentially unhappy woman," says an article in the September issue of *Woman's Magazine*.

"We wonder if he ever had a wife."

Maybe Another Flood.

If these three archers find the ark, as they seem to be seriously about, they may be able to relieve the housing situation by having the government build them a house.

From the consumer standpoint, the indicated bumper crop should assure plentiful supplies of feed for production of meat, dairy and poultry products well into 1951. But it may create a big price support and storage problem for the government.

Admonished to Behave.

A man lay sleeping under the shade of a spreading tree. His arm around his face, but he paid no attention to them. Finally a hornet stung his nose. Brushing off his face slowly, he said that if they couldn't behave, they would all have to go off.
