There is a saying, traditional with [ona] [uncertain] of the leading American [oi] [uncertain] companies, that when a director retires, the company [hirca] [uncertain] a new office boy. The concerns magazine observes that there may be an element of exag- [geraton] [uncertain] in this, but that it docs in- [dicate] [uncertain] the [companys] [uncertain] high regard for its junior members and iu continuing preference for promotion from within." The whole [of] [uncertain] industry, in fact, ta: [a@] [uncertain] splendid example of how opportunity is offered to able and ambitious people. The [roater] [uncertain] of top executives is liberally [aprinkled] [uncertain] with the names af men who began as office boys or in some similar position. Its the old story of starting at the bottom of the ladder and climbing up, and its just ax valid body os it [cver] [uncertain] was.

This [isnt] [uncertain] the [reault] [uncertain] of altruism

on the part of the [ol] [uncertain] Industry, or any other enterprise which has a like pol- icy. One reason American industry leads the world by a wide margin ts that it is always [jooking] [uncertain] for new Sdeas, new blood. Theres always room at the top, and the [competiyon] [uncertain] for people with ability and the wild fo work is generally keen. Back of every step forward industry takes, there is always o group of human beings, The machines, wonderful as they are, are secondary. A lot of fun is made of the Horatio Alger story or rags to riches. But the big thing ia that it happens here.

BAME OLD REFBALN,

Like the music in song popular [1,] [uncertain] some years beck, discussion of our unbalanced foreign trade goes round and round." And Ilke the muscle again, it always comes out here." We must buy more from foreign countries 20 they can keep on buying from ws. The refrain has been beard more or less continuously [alnce] [uncertain] the end of World War I left os in the economically [wotenable] [uncertain] position of a creditor nation with a favorable trade balance.
