**[MEXICOS] [uncertain]
RISING PRODUCTION.**

President Miguel [Algnans] [uncertain] administration may go into the record as one of the pretest in: Mexicos [history—and] [uncertain] for a unique reason, By stressing industrial production, he has got to the root of the difficulty that has confronted Mexico [nnd] [uncertain] most other Latin-American countries, Barry Bishop of The News" Bureau at Mexico City tells the interesting story in the issue of Dee. 4.

It is often [snid] [uncertain] that [Mexico] [uncertain] is a land of contrast. This has been true with respect to its advantages and disadvantages. Without

Crockett Courier — December 14, 1950

navigable rivers and with a surface of widely varying [clevation,] [uncertain] it has been slow to achieve an effective transportation system. The many different Indian tribes added to the tendency toward provincialism. Mexico was slow to develop primarily because of the inertia imposed upon it by geographic and political conditions.

President Diaz saw the light, but in" encouraging foreign investors he made the mistake of failing to protect his own [countrys] [uncertain] interests. Under the present program, Mexico seems to be on the verge of realizing a highly productive economy that [penefits] [uncertain] the Mexican people in a rising standard of living. Progress to this end is being made also in other Latin- American [countries.—Dallas] [uncertain] News.

Perhaps the most important quality in an [seeretary] [uncertain] or in anyone else for that matter, is personality. What we call personality is a mysterious, elusive thing that is hard to define. It is not beauty, it is not pretty clothes, it is not altogether brains. It is the soul that looks out from your eyes and that is yours and yours alone. Nobody else on earth has exactly your personality. Nobody else on earth can develop it but you. A good personality is that rare charm that makes people enjoy being near you and that spreads sunshine and harmony in the office and wherever you [go.—Hubert] [uncertain] M. Harrison. I

[HIGHWAY] [uncertain] WELFARE IS ONLY QUESTION.

Whatever may be the existing inequities, if any, between forms of transportation, these will continue to compete between themselves unless and until some more efficient and economical means is developed. The chances are that rails, trucks, planes and pipelines will be arguing for years to come. Certainly all inequi- ties should be abolished except where the public interest can be clearly shown, But that is another matter.

It has no bearing on what the truck load limit in Texas should be. The single question involved in [changé] [uncertain] is the good of the highway. All traffic over highways causes deterioration.

Crockett Courier — December 14, 1950

All authorities are agreed that the applied weight is the damaging agent.

The right formula is the [weighteat] [uncertain] which the least damage is done to the road surface or which lessens least [I] [uncertain] the roads serviceable life, in propor- [tion] [uncertain] to the share of the upkeep which the commercial vehicle is expected to pay.

The Texas Motor Transport Asso- [Jciation] [uncertain] will ask the incoming legisla- [ture] [uncertain] to alter existing restrictions in two [respects: '1..To] [uncertain] increase the per- fitted overall weight limit from 48,-

000 to 72,000 pounds without disturb- ing the [18,000-pound limiton] [uncertain] each axle. [2., °To] [uncertain] increase the truck-and- trailer-equipment length from, [45] [uncertain] to

[illegible or non-text passage omitted — see scan]

Both changes, according to TMTA, are approved by the American Asso- [ciation] [uncertain] of State Highway Officials. Any change in highway loads, it seems to The News, should be made [3] [uncertain] only in accordance with a sound [prin-] [uncertain] [ciple] [uncertain] long urged by motor transport groups themselves. This is that psy- [sical] [uncertain] test is better than prejudiced opinion. In progress on a designated stretch of Maryland highway near

Washington are tests that should be reasonably conclusive as to the ef- facts of weight [lodds] [uncertain] on highways. One preliminary report has been ren-
