ANTI-INFLATION FIGHT LOST? There is every indication that business and government alike have abandoned any real fight against inflation; that there is an acceptance of financial doom which only adds to the inevitability of monetary disaster in the United States.

Figures collected by the Bureau of Labor statistics show that for the first nine months of 1950, 1,000,000 organized workers received not only immediate wage increases, but also promises of more rapid price developments. There has also been a decided increase in the inclusion of cost of living adjustments in wage contracts.

This departure in industrial relations, nearly always the result of voluntary action on the part of employers, is indicative, some observers say, of a feeling on the part of management that it is no longer possible to hold the line unless and until government uses force.

The administration has, however, refused so far to take all-out action. Its representatives, both among administrators and economists, give no indication of adopting any fundamental reforms which would reverse the inflationary trend. The talk among those who do the thinking for the administration along economic and financial lines is that deficit financing cannot be avoided for the next 30 years and that any effort to balance the budget or reduce the national debt might cause the development of chronic unemployment.

It is obvious that we cannot safely have a greater degree of inflation than we already have. The deterioration in the purchasing power of the dollar is already so great that the value of our standard medium of exchange is being eroded.

ANTLINELATION FIGHT  
LOST?

Thoro is [overy] [uncertain] Indication  
that [buslnossa] [uncertain] and  
government alike have abandoned any  
real fight against [inflatlon,] [uncertain]  
that there is an acceptance of financial  
doom which only adds to the Inovitability  
of monetary [disnetor] [uncertain] in the  
United Statos,

Figures collected by the Bureau [of]  
[uncertain] Labor statistics show that for  
the first mine months of [1960,]

This [doparture] [uncertain] in  
industrial relations, nearly always the  
result of voluntary action on the part of

some [observors] [uncertain] say, of a  
feeling on tho part of [managoment]  
[uncertain] that it is no longer possible to  
hold the line unless and-wntil government  
uses- force.

The administration has, [however,]  
[uncertain] refused so far to take all-out  
action. Its representatives, both among  
administrators and economists, give no  
indication of adopting any fundamental  
reforms which would [roverse] [uncertain]  
the t inflationary trend. The talk [among]  
[uncertain] those who do the thinking for  
[the\$] [uncertain] administration along  
economic and financial lines is that deficit

financing cannot be avoided for the next  
30 years and that any effort to balance the  
budget or reduce the national debt might  
cause the development of chronic  
unemployment.

It is obvious that we cannot safely have  
a greater degree of inflation than we  
already have. The deterlora- lon in the

Price Controls,
