PUBLISHER'S NOTICE

In case of error or omission in legal or other advertisements, the publishers do not hold themselves liable for damages, further than the amount received by them for such advertisement. Advertising is accepted only on this basis.

Any communication for publication in legal or other advertisements, must be in the hands of the publisher at least 10 days before the date of publication, and all such communications must carry author's signature.

All unsolicited manuscripts, letters and pictures are sent at the risk of the owner.

Obituaries, resolutions, cards of thanks and other matter not "news," will be charged for at the rate of 20¢ per line.

Parties ordering advertising or printing for societies, churches, committees or organizations of any kind will, in all cases, be held personally responsible for the payment of the bills.

ANTI-INFLATION FIGHT LOST?

There is every indication that business and government alike have abandoned any real fight against inflation; that there is an acceptance of financial doom which only adds to the inevitability of monetary disaster in the United States.

Figures collected by the Bureau of Labor statistics show that for the first nine months of 1950, 1,000,000 organized workers received not only immediate wage increases, but also promises of more regardless of price developments. There has also been a decided increase in the inclusion of cost of living adjustments in wage contracts.

This departure in industrial relations, nearly always the result of voluntary action on the part of employers, is indicative, some observers say, of a feeling on the part of management that there is no longer possible to hold the line unless until government uses force.

The administration has, however, refused so far to take all-out action. Its representatives, both among administrators and economists, give no indication of adopting any fundamental reforms which would reverse the inflationary trend. The talk among those who do the thinking for the administration along economic and financial lines is that deficit financing cannot be avoided for the next 30 years and that any effort to balance the budget or reduce the national debt might cause the development of chronic unemployment.

It is obvious that we cannot safely have a greater degree of inflation than we already have. The deterioration in the purchasing power of the dollar is already so great that the value of our standard medium of exchange is being destroyed.

Chicago, Ill., October 30.—A spokesman for the shoe industry predicted a 10-per-cent increase in the cost of shoes in 1951.

Harold Volk of Dallas, president of the National Shoe Institute, attributed further boosts in shoe prices to the rising costs of leather, linings and wool.

"A shortage of skilled workers—both in manufacturing and retailing—is our most important problem," he said in an interview.

SHOE COSTS TO RISE, VOLK SAYS

Sydney, Australia.—The millenium seems to have arrived for the hired help in this labor-short land.

One Sydney boarding house, fussy about how its boarders dress for meals, has sternly reminded one new-comer, who likes to wear open-necked sports shirts, that henceforth he must wear a tie.

The boarder agreed—until he saw another diner wearing a flannel undershirt and demanded the reason.

"That's the handymen," explained the waitress. "He's allowed to wear what he likes. We can get plenty of boarders, but labor's difficult."

Price controls attempt to suppress the symptoms of inflation. They do not attack the problem of cheap dollars at its source, which is an increase in the supply of money in relation to the supply of goods and services. Instead they conceal the decline in the value of money with artificially low prices. This, in turn, makes it necessary for the government to regulate the distribution of goods by priorities, allocations and rationing. Price controls tend to reduce production. They cause black markets. They require administrative personnel both in the government and in business.

As his money grows cheaper and cheaper, requiring more and more of it to buy the necessities of life, Friend Miller says that he is looking for a sizable bailer in order to put his money in a bank before bringing it to town to make necessary purchases.

BE CAREFUL ABOUT DOCTORING SELF

Austin, Texas, Nov. 5. "The wide advertising of antihistamines for the prevention of colds should not persuade people to place too much confidence in these drugs as a treatment for colds," Dr. Geo. W. Cox, state health officer, warns the citizens of Texas.

"Those who decide to take any of the antihistamine pills should realize it is highly important for them to follow exactly the directions."

"Regardless of the effectiveness of these new products, it remains undesirable to take the ordinary precautions against contracting a cold—adequate sleep, clothing adapted to the weather, well balanced diet, moderate outdoor exercise and avoidance of unnecessary contacts with those already suffering from colds. Extra rest and the drinking of large amounts of fruit juice are still important aids to physical well being and cure if a cold occurs."

"Unfavorable reactions such as dizziness, drowsiness and temporary loss of muscle control sometimes occur after taking this drug. Every one is strongly advised against driving an automobile or working around machinery while taking the pills."

"Some readers of advertisements may get the idea that taking small doses of antihistamines every day will prevent colds. Such use of drugs should be discouraged. Antihistamines are still new and largely unproved drugs. Physicians have not yet determined what effect these products may have upon the human system if taken over a long period of time."

The basic cause of infection in relation to the supply of goods and services is the shortage of goods and services. When there is a shortage of goods and services, the price of goods and services rises. This is the cause of inflation.

When there is a shortage of goods and services, the price of goods and services rises. This is the cause of inflation.

FERGUSON WINS LAWSUIT

Trail of the \$254,000,000 Ferguson anti-trust and patent suit against Ford Motor Company, Dearborn Motors and others will take place in New York city, as a result of the refusal of the United States supreme court to review an appeal for a change of venue.

Pre trial activity has been centered in the southern district of New York since the original filing of the suit in 1948. The defendant, Ford Motor Company, Dearborn Motors and others, made four attempts to transfer

the site of the trial to the city of Detroit. Earlier motions by the defendant's attorneys to shift the action to the Michigan district were taken denied by United States District Judge Alexander J. Ryan, and his latest decision was affirmed by the court of appeals for the second circuit on May 8 of this year.

Who Owns The Federal Land Bank
and The National Farm Loan
Associations?

All of the capital stock of the Federal Land Bank of Houston is owned by Texas national farm loan associations.

The national farm loan associations in turn are owned by over 30,000 individual farmers and ranchers of Texas.

Each association elects its own board of directors and officers. Their business, therefore, is handled by homefolks who know and understand local conditions.

DOUBLE-BILLING IS UNETHICAL

There has been considerable comment recently on double-billing practices in the advertising industry. The subject is taken up in a recent issue of the Southern Newspaper Publishers' Association's "Newspaper News."

Advertising offered to steer a 50-50 split between the advertiser and the newspaper to the local newspaper. If the advertiser would bill the agency at the local rate, the newspaper to bill the advertiser at the local rate, the advertiser would be able to get the best of both worlds.

When there is a shortage of goods and services, the price of goods and services rises. This is the cause of inflation.

Is your home lighting GOOD or BAD?

Let us check it for you...

S O OFTEN, the value of better light is overlooked. It is the most essential electric service in the home. Directly or indirectly, it affects health, happiness, education, comfort, convenience... in fact, every phase of your well being.

A TPL Home Lighting Specialist will be calling at your home soon. The purpose of the visit is to help you make better use of the lighting equipment you now have. Ask her to come in and check your lighting... this service is absolutely free! She will suggest the proper size and type bulbs for every room in your home. So many times, old lamps cause eyestrain with resulting headaches because they do not provide proper quality of light... the Home Lighting Specialist will demonstrate how old lamps can be modernized and made more efficient, by simply changing the old lamp harp and twisting the bulb to the new R-40 white lamp.

If you would like to have a TPL Home Lighting Specialist check your lighting right away... call your Texas Power & Light Company office.
