INDIA WANTS NO MONKEY BUSINESS IN HER CROPS

New Delhi, India, reports that India is in war, but the war is with monkeys.

According to the India government, there are 50,000,000 monkeys in India.

They destroy the crops of Indias farmers, It is against the Hindus religion to destroy the monkeys, but the Hindus are in the minority and the monkeys in the majority in Indian.

The laws of Indin permit the Hindus to have their religious beliefs, but they have laws against crop destruc- [tion,] [uncertain] and so the monkey business must go. [uncertain] lands, 5 [y} By] [uncertain] the standards that count dn Asin [2p] [uncertain] tony te [Tinted] [uncertain] States failed ta pro- [I}] [uncertain] vide the Philippines with an [ndequate LH] [uncertain] foundation for developing democracy, [e]} [uncertain] AL the same time the Filipinos confused independence with freedom, It is new questionable whether on heir own they can maintain either of these [4]} [uncertain] privileges. [Americans] [uncertain] who arrived here after tithe islands were ceded to the United States in 1898 moved energetically ty belem? up the corruption and tyranny left by the Spaniards, [Ina] [uncertain] burst [f0f] [uncertain] benevolent paternalism, the United [States] [uncertain] set out to provide the Philip- [Pines] [uncertain] with schools, courts, equality before the law, public health and ef- [ficient] [uncertain] and fairly honest administration. We succeeded in this effort to Ja remarkable degree and wen the gratitude of many Filipinos, The United States, however, failed to promote a corresponding [eeconomic] [uncertain] and social development, Many of the Jills that threaten the [existenee] [uncertain] of this [Jyoung] [uncertain] republic today can be traced to our mistakes and omissions.

A [countrys] [uncertain] agriculture is usually a good index to its real Prosperity, even in industrialized [ureas] [uncertain] of the world, It is particularly [important]} [uncertain] in the Philippines where about 75 [per.]} [uncertain]

cent of the population lives on the land
uo

With the exception of some [large!]} [uncertain] estates growing crops such as sugar cane and pineapples, and a few [essen-]} [uncertain] [tially] [uncertain] experimental farms, agriculture in these islands is almost as backward as it was 100 years ago. But now the same primitive methods must feed a population that has more than doubl- ed. We started agricultural schools here but the ideas were never really put to work on ordinary farms. The average farmer still does not use fertilizer, improved seed, crop rotation and disease control methods. The Spaniards had awarded their Political and church favorites huge estates. These often

included thousands of acres and several hundred families over whom the landlord wag waster. Although most of these lands had originally belonged to the individual Filipinos who lived there, the Americans recognized the Spanish land grants. By so doing we per [petuated] [uncertain] one of the more medieval systems of land use in Asia,

During the last 50 years several limited attempts have been made to buy up land and resell it to tenants. But in general this old land system still functions oo

MONTGOMERY WETS AHEAD INELECTION

Conroe, September [7.—It] [uncertain] looked as if beer sales would remain legal in Montgomery county Thursday night when unofficial but complete returns from 16 out of 21-boxes showed the wets leading 2,590 to. 1,782,

The election, a county-wide affair, vas on the sole issue of whether to continue or outlaw beer sales. Other [Ucoholic] [uncertain] liquor sales are illegal in the county now.

Beer now is sold only in Precincts and 2, including Conroe and Willis this practice will continue if the wet rend holds up, and there seemed only slim chance of a last-minute dry victory.
