HARRISON COUNTY 3,000 ACRES UNDER QUOTA

[illegible or non-text passage omitted — see scan]

Marshall, Texas, August [7.—Harrie] [uncertain] son county cotton farmers planted 6,000 acres less than they were allotted [Secretary] [uncertain] W. 8. Black of the local production and marketing administration said Monday,

The allotment for the county is around 26,000 acres, Black estimates 20,000 acres were planted. 7

A total of 1,500 farms have been measured, and of these more than 276 have been [overplanted] [uncertain] in cotton, [How.] [uncertain] ever, Black explains that 90 per cent of the overprinted farms are only an ere or Ko over,

He said that these farmers wanted to make sure the quota was met and [(consequently)] [uncertain] got a little over,

The shortage comes from farmers who were allowed small quotas and did not plant any cotton, he said. There were about 3,000 of these.

About 1,000 farms are yet to be measured. Black expects around 400 farms to be [overplanted] [uncertain] when the measurement process is over.

The measurement of the cotton acreage has been under way for two and a half months, he said, It is expected to be finished by the end of August,

Those that have [overplanted] [uncertain] only slightly are plowing up the extra acres, he said, but those that have large amounts of [overplanting] [uncertain] are pay- ing the penalties.

MANSION

Washington, August [7.—The] [uncertain] red carpet of hospitality which the American government rolls out periodically for visiting foreign dignitaries [in-] cludes [uncertain] a 160-year-old mansion and a room with a view.

Prospect House, the Georgetown home of the late James V. Forrestal, is now the State [Departments of-] ficial [uncertain] guest house for all visiting [na-] [uncertain] bobs.

The department leased the [house] [uncertain] from Forrestals widow last fall after President and Mrs. Truman took over Blair House, where the [government] [uncertain] used to put up out-of-town visitors, during restoration of the White House.

The government pays \$800 a [month-:] [uncertain] rent, but department officials [think.] [uncertain] they made a bargain.

Between official stays, the house is used almost daily for diplomatic luncheons, receptions and dinners. Officials estimate Prospect House is operated more cheaply than if the government relied on hotels for lodging and catering.

No hotel could provide the homelike atmosphere studiously planned by the housekeeper, Victoria Geaney, with the help of a full-time staff of four, plus four extra servants for special guests.

[TEXAS.COTTON.CROP:]

[uncertain] FOR 1950

ESTIMATED AT 3,000,000
BALES

Washington, August [8—The] [uncertain] agriculture department today forecast this years cotton crop in Texas at [3,000,-] [uncertain] 000 bales of 500 pounds gross weight.

That is 76 per cent of normal, [or]] [uncertain] an average of 334 pounds per acre.

For the entire cotton belt, the forecast was for 10,308,000 bales,

This first estimate of the year compares with last years crop of 16,- 128,000 bales, and with a [10-year]] [uncertain] average of 11,599,000 bales.

The [indiented] [uncertain] sharp drop in [pro-] duction [uncertain] reflects operation of a gavel. [ernment] [uncertain] crop control program [design-] [uncertain] ed to prevent the accumulation of excessive supplies,

The cotton acreage in cultivation July 1 was about 31 per cent smaller than a year earlier.

This years crop will be supplemented by a carryover of about 7,000,000 bales from previous crops. The total supply would be more than ample to meet anticipated market needs,

The trouble with most of us is that our necessities are too luxurious and our luxuries are too necessary.

Each year ten millions of square yards of cotton cloth are used to make American flags.
