[uncertain]

Taxes have been cleverly moved:

from those having the most votes to
those having the fewest. The work was
done by first determining the favors which
the house ways and means committee
wishes to bestow and unloading the
resulting burden upon that black sheep of
politics, big business.

President Truman suggested relief in
wartime excise rates totaling about

\$660,000,000. He told congress that if
these were granted, compensating
revenues [muat] [uncertain] be provided.

The house committee increased the
amount of tax relief to more than \$1,-
000,000,000. It provided only about

\$450,000,000 by closing some existing
tax loopholes and reached for an ad-
[ditional] [uncertain] \$433,000,000 by
increasing the tax on large corporations
from 38 to

There is no actual tax relief in such a

Politicians running for office hope to
benefit by the deception they have
practiced. They will scream about the
lowered excise taxes and [softpedal]

obtained, not by [jug-:] gling] [uncertain]

economy. Instead of adding new taxes to

VOLUNTARY ASSOCIATION?

In his single-shot interview with Arthur
Krock of the New York Times last year,
Mr. Truman explained his FEPC. He said
the idea of involuntary association of the
races was all stuff-and-nonsense. Puss his
FEPC bill, he said, and the way would be
open for voluntary mingling. Nobody
would be forced into anything.

Well, Thursday Mr.
Trumansspokesmen in the senate insisted
on killing out of the draft extension bill
the sensible provision that men called
involuntarily to the colors could elect to
serve with units of all one race or with
mixed units. This proposal is exactly in
line with what Mr. Truman has declared
that he means by FEPC. If so, why did he
want it killed in the draft act?

If the president meant what he said to
Arthur Krock, he would, veto [thelbill]
[uncertain] unless the clause.is restored. In
fact, he could insist upon and get it in the
final form of the bill itself.

How about it, Mr. President? We

THE RUIN OF A DEMOCRACY.

The insolence of demagogos is generally the cause of ruin in democracies. First, they calumniate the wealthy and rouse them against the government, thus causing opposite parties to unite against a common danger. Next, they produce the same result by stirring up the populace and creating a sense of insecurity, Nearly all the tyrants of old began by being demagogos. [In] [uncertain] well-balanced commonwealths, besides strict observance of established laws, it is especially

necessary to keep close watch on little matters. For a great change in the laws may creep on gradually, just as a small expense often incurred ruins a large fortune.

Next, let men be on their guard against those who flatter and mislead the multitude their actions prove what sort of men they are. Of the tyrant, spies and informers are his principal instruments. War is his favorite occupation, for the sake of engrossing the attention of the [people]] [uncertain] and making himself, necessary to them as their leader.

An unbridled [demoeracy] [uncertain] is exactly similar to tyranny. Its objects and instruments are the worst, and both are equally served by the tamest of mankind. It is always anxious to lord it as a sovereign it, therefore, has its flatterers in the shape of demagogos.

Ancient customs must be done away with, ancient ties, civil and sacred, must be broken everything must be changed according to new and false theories and the result is an assimilation of democratic to tyrannical government, in its habits and mode of [action.—Aristotle.] [uncertain]

AKAL FOR PUBL aC HOOLS,

One of the [boanta] [uncertain] of
native [orn] [uncertain] Americans has
always been that holt own local
community was [eapahlo] [uncertain] of
directing its own affairs, But, when talk of
[fodernt] [uncertain] ald to education
[oceupled] [uncertain] ne much apace in
the public press and on the floors of
congress, it looked ns though local
responsibility for the welfare or decline f
our public schools had been handed over
to the Federal government, or was about
to be so handed over.

PERSONALIZED LAW COSTLY,

In the [nratie] [uncertain] from hie
SOUTIERN WEEKLY quoted on thin
page today, [Potor Molynenux]
[uncertain] shows convincingly that, no
far as Jaw is concerned, the federal

supreme courts [raling] [uncertain] in the
tidelands cane, costly to [Toxay,]
[uncertain] did not follow the law. Tt was
based in fallacy and wrong in fact.

The trouble is that the four-justleo
[decinion] [uncertain] which under the
[cireumataneoh] [uncertain] constituted a
majority though an actual minority of the
court, was personal opinion of
expedience, not a judicial determination,
or that reason, the men who were fighting
the case for [Texans] [uncertain]
considered in advance that they had lot, an
[appre-] honsiore] [uncertain] sustained by
the event. [Tidy]) [uncertain] were
convinced that their case wan sound in
law and in justice. [Thoy] [uncertain]
were equally [convineed] [uncertain] that
the court would blandly ignore both.

This is exactly what happened, The
minority justices came up with an opinion,
framed of word juggling by [Justice]
[uncertain] William O. Douglas, that
ignored the facts and substituted an
untenable hypothesis,

No more tortured decision has emerged
from the court unless it was the opinion
which denied the right of a creditor to
appeal against the federal governments
repudiation of the gold standard, If the law
of contracts and the constitution [menn]
[uncertain] anything, everyone understood
that the [plaintiff}] [uncertain] was right
and the [governmentand] [uncertain] the
court wrong in that [instance.—]
