In desperation the party leaders so- Heited every possible source of revenue and the negroes who had joined the party in recent years responded most generously, more than 400 in Texas contributing and a number of them giving \$600 each,

Of course the party leaders kept n list of generous contributors for future [referencee] [uncertain] so when the drive for funds opened this year tho list was pulled out of the file Tho first fund-raising event was the dinner at Austin and all on the Hist were [sent] [uncertain] invitations to the dinner. NATIONS CRACK ON TAX POLICY.

Notably nonpartisan, the Brookings Institution hag developed another of its interesting studies on public questions,

this one attacking the problem that affects every citizen and with the people the government itself, Not too much research is required to demonstrate that inability to carry a crushing tax burden has been an important factor in the collapse of every great nation that the world has known. Economist Lewis Kimmel would have the United States pull up and revise its tax policies before it is too late.

Government begins as a service to the people, all too soon gets around tote officeholder idea that people are the servants of the governed.) That the best-governed people is that which is governed least is a homely and truthful axiom for the simple reason that no government is good if its cost is too high and a burden on those who support it. As [Mr.].] [uncertain] Kimmel points out, the desirable [goal]] [uncertain] is taxation not to exceed 10 per cent of income.

The figure is significant, as it [goes]] [uncertain] back to antiquity when the [church]] [uncertain] was the state and the tithe the [com-|. municants] [uncertain] tax assessment in a [sense.]] [uncertain] The church could not have been the state very long had it adopted a [slid-]] [uncertain] ing scale that took as high as 86 [per]] [uncertain] cent-of some incomes. It is open [to]] [uncertain] question whether this republic can survive any protracted length of [time]] [uncertain] l without revising its tax exaction downward.

Today the individual income i fax has a ridiculous base in starting on" [the]] [uncertain] first penny earned above \$500 [by].] [uncertain]

[tH] [uncertain] unmarried individual. Nothing can disguise the fact that present [im-:] [uncertain] posts begin tan early bracket [to.]] [uncertain] become oppressive expropriation of the returns of effort.

And when your on your knees, [youre] [uncertain] closer to the accumulation [of:] [uncertain] solvent vapor. The state health [of-:] [uncertain] finer proved his whole point with [this] [uncertain] story:

A man attempted to remove the grease from the underside of his [car:] [uncertain] by spraying it with a spray gun [he-:] [uncertain] had brought home from his construction job. He was found dead under the car, suffocated by the vapor of the cleaning agent.

Proper use of cleaning solvent, says the doctor, calls for opening all the doors and windows when cleaning floors, the underside of [houschold] [uncertain] furniture, or clothing. The idea is to get as much ventilation as [pos-] sible.] [uncertain] A fan blowing on the working area is helpful.

When doing a job of this sort, work for a short [time—avoiding] [uncertain] inhaling the vapors ag much as [possible—and] [uncertain] then get into the fresh sir for a minute or two.

The first symptoms of vapor [poi-] soning] [uncertain] are nausea, dizziness, headache and fatigue. When you notice them, get outside as soon as possible, the health official advises.
