HELP IN HUGE BOOKKEEPING JOB

If practice [maken] [uncertain] perfect, the So- cell Securtty administration, should have some excellent bookkeepers in its Division of Accounting [Quorotionn] [uncertain] in [Baltindre,] [uncertain] Maryland, The Soetal

Security administrations claim of being the worlds largest bookkeeper wan [atrongthened] [uncertain] by recent figures which show that more than 94 million social security accounts have been set up.

In these accounts the government keeps track of each workers earnings in jobs covered by the law. [Informa-] [uncertain] [tion] [uncertain] is obtained from [employors"] [uncertain] HO- caul [accuracy] [uncertain] tax returns, which bring in wage reports at the rate of 46 million individual items every three months. Ag might be expected, with this [volumo] [uncertain] of work, there is occn- [sional] [uncertain] difficulty in making things bal- [ance.] [uncertain]

The main difficulty, according to

L. R. James, manager of the Lufkin office of the Social Security,-Admin- [istration,] [uncertain] is in the failure fo" employers to furnish correct social security account numbers for all workers. When John Smith is reported without a number or with a wrong number," James explained, all the accounting machines in our Baltimore office cant tell which one of the tens of thousands of John Smiths on our books should get [eredit] [uncertain] for those wages. And, until we get John [Smiths] [uncertain] correct number from his employer, no one is going to get-credit for them."

Social- Security administration investigations show that most errors occur [because] [uncertain] the information furnished by the worker was not checked against his social security card. Mr. James stated that employers who [get] [uncertain] their employees" names and [numbers}] [uncertain] directly from their social security cards are making sure that their [em-:] ployees] [uncertain] are not losing any of [the,] [uncertain] wage credits on which future social security payments will be made.

COSTLY BY-PRODUCT,

An Austin congressional candidate who used to be a mail carer has an idea for eliminating the postal deficit which he thinks is better than cut- ting down on residential mail delive- Tries,

Let federal officials, beginning with

President Truman, start using stamps on their mail, says Magnes L, Fos- [ter,] [uncertain] who is running for congress jn the Tenth District. He calls it n sim- [ple,] [uncertain] down-to-earth answer to the post office deficit."

Probably its too simple to get the job done. Mr. Fosters is not the first voice raised against the franking privilege, though its abuse rather than its use usually draws criticism,

No valid objection can be made to the free handling of necessary pov- [ernment] [uncertain] mail. It costs no more in the long run than buying stamps for government mail. But who is to de- [cide] [uncertain] what mail is necessary

Congress could tighten the rules, of course but congressmen them- selves are among the more prodigal users of free mailing privileges, If they wanted to give the post office al lift, heads of other government departments undoubtedly could find a lot of mailing which serves no useful purpose.

The fact is that too much [govern-:] [uncertain] mail is simply a by-product of too much government. If excess [gov-:] [uncertain] activity were eliminated, there is not a particle of doubt that mail carriers" pouches would be lighter and the post office would be [selfsupporting.] [uncertain] r

We don't expect Washington to [ap-:] [uncertain] ply any such drastic remedy, even to keep postal service up to [par.—Houston] [uncertain] Chronicle.
