A. [M.] [uncertain] College, is not a mysterious object. It is merely a holding tank for the household wastes where decomposition disposes" of these wastes quickly, easily and in a sanitary man- says sanitation authorities [agr:] [uncertain] t a septic tank should be enough to hold the

maximum amount of sewage discharged into it in any given 24 hour period. The minimum sized tank should hold no less than [600] [uncertain] gallons. Tanks that are too-small soon become overloaded with sludge and raw sewage and this will pass into the disposal field and clog up the system.

He says a [greas@] [uncertain] trap is not considered [neécessary] [uncertain] for the ordinary household if the tank has a capacity of 500 gallons or more. The location of the tank, however, is of primary importance, It is cheaper, he says, to build the tank close to the source of the sewage because less water tight line will be.needed. It is-not,-however, a good practice to locate a sees [tié] [uncertain] tank top. [close=to-a>] [uncertain] butting to [ths] [uncertain] makes cleaning difficult. All septic tanks will need cleaning during their life of usefulness 80 locate it where it can be reached easily for the cleaning job.
