CANCER MACHINE GRANT RECEIVED

Marguerite [Juhneaton] [uncertain] in Houston [Post] [uncertain]

The M.D Anderson [Hiepital] [uncertain] for" Cancer Kesearch has received \$121,000 fur the purchase of [f4.million-] [uncertain] volt [betatint—] [uncertain] the third of its kind in the [Western] [uncertain] Hemisphere and one of the few exiting tn the world

Announcement of the grant [wae] [uncertain] made Tuesday afternoon by Dr. R [Lee"] [uncertain] Clark Jr. director of Andergon

The grant comes from the National Cance: Institute of the U. 8. Pubbe Health Service as part of its wide program ef investigating the uses [ef}] [uncertain] varying amounts of voltage in the, treatment ef cancer.

The betatron comes to the Texas! Medical Center Research over the [tutions] [uncertain] in the United Bates.

Dr. Gilbert H. Fletcher, radie-thera-; play, and Peter Wooten, physicist, are Investigators in charge of the [pre] [uncertain] posed [isecarch] [uncertain] project i

In addition, the National Advisory [Counci]] [uncertain] has recommended and the [u.] [uncertain] 6. [aurgron] [uncertain] general has approved [\$16,-) R4s] [uncertain] for [1962-54,] [uncertain] and [tbe] [uncertain] same amount again in 1954-55 [fot] [uncertain] future support ef, the project These grants will de-, [pend] [uncertain] Dpen [spprepiations] [uncertain] by congress,

Dr. Roy Heflebauer, Anderson asalst- ant director, said j The betatron is the most powers!

uf all the [exialing] [uncertain] X-ray machines,

though older types of instruments can produce euper-voltage in a cofe- parable range.

This dues not mean," Dr. Fletcher, [emphasised,] [uncertain] that we have s cure for cancer." [Jt] [uncertain] only means [thal] [uncertain] we hare

amplper and more effective instru- [ment] [uncertain] for radiation therapy that we can do better what we have already been doing with boss powerful

duce 3 million vote.

But the betatron will be eight times as strong as the Cobalt-60 with

24 million volta. J

This means." Dr. Fletcher enid,

that we can investigate the various [therapeute adrantages] [uncertain] of voltages af three completely different levels."

The greatest virtue of the suppr- [voltage] [uncertain] machine bs that it concentrates a much stronger bombardment of ra- [diation] [uncertain] at the site of the tumor with much leas damage to skin and inter- [vening] [uncertain] body [tlesues.] [uncertain]

For example, in a career of the [esuphagua:] [uncertain]

To throw 63 roentgens at the tu- [mor,] [uncertain] with 400,000-volt machine, it ts [mereseary] [uncertain] to hit the shin with [JOU,] [uncertain] To throw 100 at the tumor with la betatron, it is necessary to hit the akin with only 15--for the betatron [butids] [uncertain] up impart By [itz bram] [uncertain] mores through the body. [This] [uncertain] means," Dy. [Fheieher] [uncertain] bald, that with the betatron we hare leas [Jakin] [uncertain] reaction, stronger percentage of the desk at the ate of the tumor, leas [ubsrptionof] [uncertain] the X-ray by the bones, and lean discomfort for the [j] [uncertain] patient in terms of [pyatemic] [uncertain] reaction."
