Volume [LXII]—[Nuumber] [uncertain] 43

[(0] [uncertain] ACREAGE [ALLOTMENTSON.] [uncertain] 1953 COTTON

[Secretary] [uncertain] of Agriculture Charles F. Brannan announced [thia] [uncertain] week that here will be no marketing quotas or acreage allotments on upland or extra long staple cotton produced in [1933.] [uncertain] of

Under provisions of the Agrievl- ural Adjustment act of [1938.] [uncertain] aa amended, the secretary Js required to proclaim a national marketing quota by October 15 whenever he de [termines] [uncertain] that the [elotal] [uncertain] supply of patton for the marketing year which begins in that calendar yea? will [excoed] [uncertain] the [normal™] [uncertain] supply. In the case of extra long staple cotton, proclamation is required whenever the total supply exceeds the normal" [Fopply] [uncertain] by more than fer cent The normal"

[sopply,] [uncertain] as defined in the act, fs the estimated domestic consumption and [exporta] [uncertain] during the marketing year plus a carry-over allowance of 50 per cent.

The latest available statistics of the federal government indicate that the total supply of upland cotton does pet exceed the [9 notral"] [uncertain] supply. Therefore, marketing quotas and acreage [silotments] [uncertain] arc not required on the 1953 upland gotten crop.

The total [sopply] [uncertain] of upland cotton for the 1962-83 marketing year is

[illegible or non-text passage omitted — see scan]

[cludes] [uncertain] a carry-over of 2,652,000 bales

[illegible or non-text passage omitted — see scan]

production of 11,684,000 bales anil estimated [importa] [uncertain] of 85,000 bales.

The calculated normal" supply of upland cotton for the 1052-53 markat-

[illegible or non-text passage omitted — see scan]

ing [stiniated] [uncertain] domestic consumption of 9,340,000 bales, estimated exports

[illegible or non-text passage omitted — see scan]

allowance for carryover, 4,173,000 bales.

The total supply of plan! [cotten] [uncertain] ie therefore 1,622,000 bales below the

norms" [supply—the] [uncertain] level at which [gootas] [uncertain] would be called for,

According to the departments de- terminations [tbe tetal™] [uncertain] supply of extra long staple cotton exceeds the" [Z] [uncertain]

normal" supply by mare than 8 per

[Jeent.] [uncertain] However, because extra long staple cotton ts a strategic raw material for national defense, marketing quotas for the 1953 crop of such cot- ton produced in the United States bare not being [procleimed.] [uncertain] The ste-" [tleties] [uncertain] on the total supply and

normal" supply are not shown as they [s—s—s*] [uncertain] include the stockpile reserve. Under [provislona] [uncertain] of law, the acre- age planted to cotton in 1963 will be considered a3 part of the base acreage in establishing future cotton [Sate] [uncertain] acreage allotments. J. Lynn Mauk, Administrative Officer, [Houston] [uncertain]

County PMA.
