CROCKETT COURIER: MARCH 5, 1953

DAVY CROCKETT TRINITY COUNTY SOIL CONSERVATION

J. C. Evans, cooperator and dairy farmer whose farm is near Weldon, is well pleased with singletary peas and vetch for winter grazing.

In 1951, Mr. Evans planted eight acres of singletary peas, vetch and oats. At the time of planting he applied 150 pounds of 0-14-7 per acre. He got good growth and grazing for four calves. He seeded the eight acres with oats and applied 200 pounds of 8-8-8 fertilizer per acre. Mr. Evans grazed 24 head of dairy cows from the 7th of January to the 11th of April with the exception of six wet days.

Mr. Evans feels that his milk production was increased 1 1/2 cans per day during this time due to the green pasture.

In the fall of 1952 he applied 400 pounds of 0-14-7 fertilizer and disced the eight acres. The peas, vetch and some oats volunteered to good stand. In January the eight acres was top dressed with 70 pounds of ammonium nitrate.

Mr. Evans has only grazed the eight acres four days this year due to wet weather. During this four days he has received five extra cans of milk, saved 10 lbs. of hay and 1/2 sack of dairy feed per day. Mr. Evans feels that he is making at least \$20 more per day from the grazing due to feed saved and the extra milk he is getting. He feels that he should get at least 30 days more grazing this year.

Mr. Evans said, "The peas and vetch saved I bought in 1951 was a good investment. They have volunteered every year and seem to be better than the year before."

Even with the dry fall and late planting several cooperator have reported grazing from their cover crops. All feel that the green peas and vetch and clovers have helped their cows both in gaining some needed weight and from a health standpoint. Cooperator who have received some grazing and expect a lot more are Marvin Williams, Leo Owen, John Kuttner, Buck Sullivan, Leo Knox, J. C. Mayers and several others. All are looking forward to a good seed harvest.

One cooperator reported that his cattle were doing a lot better since they started grazing his green oats.

STUDEBAKER CARS ACCLAIMED AS DISTINCTIVE

Acclaimed at press preview as the most distinctive cars ever built by an American automobile company, Studebaker's 1953 passenger car models are now being displayed locally by East Texas Motor & Equipment Company, Studebaker dealer.

Designed by internationally famous Raymond Loewy, the new Studebaker cars break as sharply with American contemporary design as did their predecessors immediately after World War II. Those who have seen the new models will set the pace for future automobile design and engineering as markedly as did the company's earlier postwar models. Mr. O. B. Rhone, of the local dealership, asserts the public is in for a terrific surprise.

These cars are not experimental cars to be built some time in the future, but cars which are in production right now, and which can be purchased at down-to-earth prices, says Mr. Rhone. Complementing the exciting styling changes will be the availability of mechanical power steering for the Commander series, the first time this type of power steering has been adapted for passenger car use. Power steering for the popular Champion will be offered later in the year.

Mr. George A. Kelly and son, James, in Kelly, spent Sunday with Mrs. Kelly's mother, Mrs. J. W. Young.

WHAT IS THE JABBERWOCK?

Jabberwock! Jabberwock! What is a jabberwock? Why, that is that imaginary evil entertainment that the Crockett High School band gave last year and it was such a enjoyable way to raise money that the band parents decided to make the Jabberwock an annual affair. Yes, the people walked in, but they did not know that they thought they would have to roll out. The invitations, rules and regulations are being mailed to you in a group of school and organizations of Crockett and Houston county. We, the band parents, will greatly appreciate your cooperation if you will participate in this second annual Jabberwock. You will have fun and will be helping to make our high school band one of the best. Date March 21, 1953.
