CROCKETT COURIER:

east part of Walker county east of the Trinity river known as Kittrells Cutoff [CULTS] [uncertain] acres).

The supervisors of the district are [farmera] [uncertain] living within the district. Joe Rosser, chairman of the board, lives near Friday; Grover [Weraterman,] [uncertain] secretary, lives in Kennard. William McLean, member of the board, lives in Crockett. Dailey Davis, the newest member of the board, lives northeast of Pennington. A. M. Calvert, [mem. ber] [uncertain] of the board, lives in Lovelady. All members are elected by [landowncre int] [uncertain] the district and serve for five years. A [newymember] [uncertain] is elected [cach] [uncertain] year,

Joe Rosser says conservation farming pays big profits on his 439 acre farm in the Friday community. Mr. Rosser [haa] [uncertain] been a cooperator with the district for ten years and has been a member of the board of supervisor for four years,

At the time Mr. Rosser worked out his plan with the district he was cropping over 200 acres. He is cultivating 120 acres now, On the 120 [acrea] [uncertain] he has built three mile of terraces. He plants cover [cropla] [uncertain] on all of his row [cropprd] [uncertain] land each year. In 1951 he picked five bales of cotton from four acres following winter cover [crope.] [uncertain] The bales [svrtaged (40)] [uncertain] pounds per bale. He is realizing more profit [frum] [uncertain] 120 acres of cropped land than he did from 200 acres prior to practicing conservation farming.

Supervisor Rosser has seeded [IY] [uncertain] acres of pasture and [bas] [uncertain] practiced woodland, improvement on [14]] [uncertain] acres Through the last ten years he has gradually apply conservation practices to most of his cropland. Rosser points out that any farmer [interested] [uncertain] in,

[tmprning] [uncertain] Als pasture, cropland or hie woodland can [gvt] [uncertain] help from the district by requesting assistance. He points out that the districts job is to. [belp] [uncertain] farmers contra? erosion, and improve [theur] [uncertain] land through organized effort. The district provides technical [aesietance] [uncertain] through the So.) [Conmerathon] [uncertain] service Ut allee provides equipment such as [cultipackers,] [uncertain] seeders, [rwh] [uncertain] shredders, combines, [fertreer] [uncertain] spreaders and grain drills to fo some of these jobs. This equipment is rented to cooperating farmers on s main: [tenance] [uncertain] rental base [Rerords] [uncertain] shew that [distr?] [uncertain] cooperators have [tnereaced profite] [uncertain] about 39%

Mr. Rosser believes that it is the duty of every farmer to take care of the land he farms. He thinks [obe] [uncertain] of the most [democrathe] [uncertain] way? v through his feral Sool [Conservetwn dastroet] [uncertain] The [distr] [uncertain] is a legal [autativieion] [uncertain] of the state, [ceganind] [uncertain] by [lendvencrs] [uncertain] and governed by them. It is run by the farmers and [dedicaird] [uncertain] to helping with the job of treating [cach] [uncertain] acre of land [arvurding] [uncertain] to [ite] [uncertain] needs and put ting it to the [uae] [uncertain] that it is best suited

Grover Westerman has 1600 acres of land that he is [imprusing] [uncertain] for pes sure. He has found [thal] [uncertain] cress fame: [ang, girweiarg] [uncertain] legumes and peeper. [fertihzation] [uncertain] are very important pasture improvement. [Ile] [uncertain] has con: [atructes?] [uncertain] fine ponds for better oo [tribatwn] [uncertain] of livestock water

Mr Westerman any fly [sercting] [uncertain] begins each as [lespedera,] [uncertain] vetch, Sin [cletary Pras,] [uncertain] hop clover, [crimacn] [uncertain] and other and [ferulizing] [uncertain] them property you can get the grass to toe Then by proper management and fetation of your [biveetockh] [uncertain] from one pasture to another

you can carry three or four Umers as many cows and [rau] [uncertain] better [calreea™] [uncertain] On acres that would carry six or eight cows when I started my gesture improvement work I can now run [O] [uncertain] head big part of the year."

[W oK McLean] [uncertain] has 764 acres, three miles north from [Crockett,] [uncertain] that he has cleared and put [inte] [uncertain] permanent pasture in the past 15 years. He has [COU acree] [uncertain] that is open and the timber has been deadened on the remainder. The pasture has progressed from woods [perature] [uncertain] to one of the best on the district.

[Mr] [uncertain] McLean with a [fitm belever] [uncertain] in dividing the pasture so he can rotate his grazing. He [cleary] [uncertain] the land with are, saws of brush shredders. He has done practically all the work himself. At a new pasture as cleared, he seeds it to legumes by feeding hay he harvested on the place. He has 1) different clovers growing in [une] [uncertain] meadow [wubere] [uncertain] he cuts hay. White Dutch, red and crimson clovers are some of his favorites. He bales the hay when the seed are mature and the seed [atft] [uncertain] out of the hay or, are scattered by the cattier. He has seeded over 50 [aciee] [uncertain] in [thie] [uncertain] manner.

Mr. McLean has a fine herd of registered Brahman cattle from which he produced with [98.4,] [uncertain] calf crop this year compared to 75% calf crop before improving [hia] [uncertain] pastures. He thinks this is due to the green greasing provided in the winter. Mr. McLean [sald,] [uncertain] On [a@] [uncertain] gesture that was carrying 18

[ruwe] [uncertain] when J started [T] [uncertain] row can carry 10 times as many."

ALM. Calvert han been a super net since the district was [orpmanize!] [uncertain] in July, 1940. His 750 acre farm is ey miles southwest of Levelady. Mr. Calvert is practicing improvement of all hie grating lend. Since about 1940 he hae increased his herd tu five times the number uf cattle he had on [hia] [uncertain] pasture then. He attributes this increase in number of cattle to two things. One is improvement of pastures by [eo] [uncertain] conditioning and improvement through the use of legumes and fertilizers. The other reason [i»] [uncertain] improvement in type of cattle fn the [tegianing] [uncertain] Mr. Calvert ran only scrub cattle on his farm. He now hae purebred Pollet Herefords He consumers them at least [f0°,] [uncertain] better than the scrubs that he used to raiser The bugger [profita] [uncertain] from the Herefords allowed him to apply more [cen. eervalion] [uncertain] to the land. This provided a [contitigious itmervase] [uncertain] in carrying capacity as hie herd has increased.

Mr. Calvert says that in Ube begin- [ning] [uncertain] he considered a pasture to be any opera area with o fear around it. He says that he hes learned from the [Sei], [uncertain] Conservation service technicians that t takes [mory] [uncertain] than a [fene] [uncertain] lo make a pasture. He is convinced now that it takes site planning, plant mixture, fertilization, and proper use to [develap] [uncertain] a pasture. He believes that al) pastures in the district would become proved pasture if the [farm-ler] [uncertain] and ranchers would regard and treat them as cath trope."

Lime, complete fertilizers, phone [phate amd] [uncertain] legumes have been uee-! by Mr. Calvert in the [tmprovement] [uncertain] of 1 hie pastures He plants winter cover crops on half of [bie] [uncertain] cultivated land each pear. This [pretides] [uncertain] winter great ing and set improvement He also provides winter crazing on pasture

land" [Summers grasecs] [uncertain] and legumes come in better after enter corer!

[Sr.] [uncertain] Calvert thinks hie calf [crope!t] [uncertain] have increased about 15s as a [reealt!:] [uncertain] uf providing green granting during [the]] [uncertain] winter months ie say hi [secther!] [uncertain] some terms through the [eintér] [uncertain] tp [bet-| ter bendtien] [uncertain] and his calves are at least one third better than calves dropped by cows not m winter covet crops fe is convinced that pasture [repera] [uncertain] Lien and mewing [ary] [uncertain] good sound [pumervatiqn] [uncertain] practices that may be [1 Uled] [uncertain] together or separately to [tnereane lan] [uncertain] grapes
