WHAT WOULD YOU HAVE DONE?

To criticism of President Rhee's startling action in ordering the freeing of 25,000 anti-Communist North Korean prisoners, the answer might be: "What would you have done?"

Those freed captives are his fellow countrymen. They are Korean patriots like himself. They are anti-Communist like himself.

It was his misfortune to live in the north part of the country which, as one of the many errors President Roosevelt and Prime Minister Churchill made at Yalta, was marked out for Soviet occupation at war's end.

The occupation was for the purpose of accepting the surrender of Japan under arms. The Russians, in turn, were to create another satellite. They did not permit free elections.

They set up a Red government under the shadow of Red army bayonets. They balked the creation of a free and united Korea, which had been the Korean national dream and objective during centuries of domination by China, Russia and Japan, successively.

The released prisoners had been drafted into an army created for aggressive purposes. They had withstood Communist indoctrination. They were not willing to return home, but were willing to join the South Korean army which to them represented the hope of realizing the kind of united country they wanted.

U. N. annoyance at Rhee for his insubordination is not entirely justified. He acted without consulting with the U. N., it is true. It is also true that the U. CLARK-RHEE AGREEMENT

In reaching an agreement with Gen. Mark Clark, President Syngman Rhee of South Korea obviously bows to the inevitable. But there is a tremendous if in the three-point compromise. That is the United States' mutual security pact, which in finality is a unilateral question. Will this country come to the aid of South Korea if it is once more attacked?

To be sure, we have placed our selves on record to that effect. We have said through both Presidents Truman and Eisenhower that we will fight Communism wherever it invades. But no president can fight a war without the congressional support of the United States.

It is difficult today to conceive all of this country that Harry Truman was acting in our own best interests in moving swiftly to halt aggression in Korea. It will still be difficult to get popular support in the future in view of the outcome of the present war. Congress seldom acts without popular support and certainly will not as to war.

The fact remains that the three points on which the United Nations are agreed are just a few. It is not a matter of a personal nature, but all such communications must carry author's signature.

THE TAXING POWER

The news to which the constitutional power to tax have been put far transcends that which could have been covered by those who adopted the constitution or by those who have since enlarged that power by amendment of the constitution. Not only has the taxing power been used in place of the police power, but it has also been employed in furtherance of what were supposed to be social benefits. The power is treated alike, that is, as a means of raising revenue, and as a means of social control. The power is treated alike, that is, as a means of raising revenue, and as a means of social control. The power is treated alike, that is, as a means of raising revenue, and as a means of social control.

Every community must have a head or some one that is willing to lead it and taking that the community property. It must be some one that does it without a selfish motive and one who evades banking in glory because of his own ambition. Such a leader can do much to cement the community together to such an extent that it can accomplish what any individual could not.

Every citizen is obligated, by morality and patriotism, to pay every cent of tax he owes. But the Bureau of Internal Revenue is equally, if not more, obligated to see that every cent of tax is paid. It is his duty to be allowed to evade the law and get away with it.

RE BY THE BASKETFUL. AUTOMATICALLY. As the good model demonstrates here, all that need to be done by the user of a new Servel Ice-Maker Refrigerator is to remove dry, super-cold cubes from the storage basket, as needed. The ice-making operation in this new Servel refrigerator requires no operation, and without messy ice trays, a large supply of cubes is kept on hand constantly. Ice making is continuous, but ceases automatically the moment the basket is full. This is just as it should be. A full self-defeating refrigerator along with its ice-making advantage.

To be sure, we have placed our-

The fact remains that the three point on which the United [Nations,] [uncertain] including the United [States,] [uncertain] along with Rhee are [fust.] [uncertain] A [mos] [uncertain] objectionable factor in the pro peace [pariry] [uncertain] after truce ts the [absen] [uncertain] of a time limit. SPECIAL IN TEXAS.

The [oblervance] [uncertain] of June Dairy Month in Texas hae far more signifi- [cance] [uncertain] than is attached to the general

run ef special months. It is linked

with an outmoded past, an urgent present end s foreseeable future. Through tt farmers are encouraged

to branch out into dairying as a side line, dairymen to [atudy] [uncertain] Improvements of herds and methods, [acientlsts] [uncertain] to conduct experiment designed to in-

Creare quantity and quality of prod- gets, and the public to learn more about the importance of the industry te our health and economy.

The development of the dairy in- [dustry] [uncertain] in Texas hae been uphill work

against a high wind of public ig- penance and indifference. Texans have been beef-m people because of their [historics)] [uncertain] background. Rural j residents in the past have been beef cattle

raisers or farmers.

It has been hard to persuade cattle- men to turn to the raising of milk cattle, which require much more [atj tention] [uncertain] and care. The farmers, sterp- ed tn the fore of cotton production, have been reluctant to start all over) tn learning a new occupation, [dairy-] [uncertain] ing being about as different from cot- ton growing as either is from watch- making.

Vet the cotton farmers could see the handwriting on the wall. The production of cotton was becoming lees [profitalile] [uncertain] and the only evidence [In] [uncertain] sight indicated no change for the) petter. It was generally predicted) that [eyntheuc] [uncertain] fibers would give nat- rat fibers more competition every) year [Houston] [uncertain] Chronicie. BY HAROLD J. ASHE.

From [thie] [uncertain] Gistance, it ia hard to tell whether President Syngman Rhee is r fool or a hero and martyr. Maybe

he is fool as a realist and a hero [nee] [uncertain] idealist.

[Tt] [uncertain] bant difficult [tothink] [uncertain] ones way through to the Syngman Rhee viewpoint He knows that the invasion of South Korea will be repeated by the Communist furies as soon as peace is declared un the present proposed basis and the United Nations arrive ate withdrawn. The Comreunist forces have the anime [rrasogs] [uncertain] for attacking today that they [hed] [uncertain] three years age when they crossed the thirty-eighth parallel.

Yet, it may be hard te explain to the [world—tncluding] [uncertain] large part of the world that ia either warmly of [juhewarmls] [uncertain] on our [aide—that] [uncertain] Syngman Kher [2] [uncertain] not making an [aggrsaee] [uncertain] demand. for Communist [propagandusts] [uncertain] to mar this look Hike on aggressive more in the eyes of many people. Syngman Rhee's defense is, to repeat, that a complete [wictory] [uncertain] in [Korra] [uncertain] is [South] [uncertain] Korea's only defense under the [circumstances.] [uncertain] It goes back to [Trumans] [uncertain] Liuader in yanking MacArthur out of [Keres] [uncertain] at the time he had the North Koreans on the run. If MacArthur had been [allowrd] [uncertain] to win a clear-cut victory, the problems [cuafrenting] [uncertain] ws in that area today would have been [treulred.] [uncertain] MacArthur knows what he is talking about when he says, There is no substitute for [victory.] [uncertain]

But we didn't let MacArthur win. That was our fault not Bouth [Kotease.] [uncertain] If we [deerrt South Korea] [uncertain] of such peace without definite understanding that we will stand best of South Korea, then we have lost the Korean war. And South [Keres] [uncertain] has worse than wet [M.] [uncertain] South [Korves] [uncertain] is? bound for extinction. The U. N. on courage by [Seng aitedse] [uncertain] on our part, should make it plain that the [integnty] [uncertain] of [BSevth] [uncertain] Korea is to be [gusrenteed.] [uncertain]

President Syngman Rhee could help by thinking realistically along these lines. There is little [ronsolation] [uncertain] for anybody who is being a martyr for a lost cause. [Dallas] [uncertain] News.
