ABOUT THE WEATHER

Weather [conditians] [uncertain] always [have!] [uncertain] been mans most interesting subject vf conversation, or as the famous quotation [goes—Everybody talks,] [uncertain] about the weather, but [nobody does}] [uncertain] anything about it." Bat chare coupled with mans [ingenglty] [uncertain] has done something bout it at best to the extent of giving forecasts much io advance of unfavorable weather [con- ditions] [uncertain] along the Gulf Coast. 4

Today there is little chance that a) hurricane [wil]) [uncertain] sneak in from tie gulf to render havoc and destruction od it did in 1900 and 1915, for man [haa}] [uncertain] Jearned to combat the effects of such storms. Weather [stalions] [uncertain] and mil- [Lona] [uncertain] of dollars spent in research en able him to [foresce] [uncertain] and examine abnormal tendencies and give some prediction of what ia going to happen, because he has better understand ing of tides, winds, pressure areas, and such elements as might contribute to bad breaks in the weather.

Radio Station KTRH, operating with maximum power at 760 on the radio) dial and covering the long coastline area from [ecctra] Louisiana] [uncertain] to Brownsville, Texas, has for a number of years offered this advance warnings information [aloog] [uncertain] with regular local weather forecasts on each of [ite] [uncertain] 31 newscasts. But, mindful of its ebli- " [gation] [uncertain] to its lateness, the station [har! rone] [uncertain] one step further and searched for additional weather information which would give everyone in ila coverage [atea] [uncertain] the weather pews they were [seeking.] [uncertain] After an extensive harvey of the Gulf Coast area it found that many of its listeners had prop-/ [erty vutaide] [uncertain] the Immediate locality and needed [infurmation] [uncertain] about weather conditions at more remote points.

This led to an agreement with [wrather] [uncertain] bureaus in seven key cities to wire [auch] [uncertain] information direct to KTRI every morning so [thal]

[uncertain] complete re-' ports on weather conditions and [foreacts] [uncertain] could be heard by farmers, [trerelev, pportemen] [uncertain] and others [uvrer tte] [uncertain] vast [Tetas] [uncertain] and Louislana coverage area These reports and forecasts are broadcast daily [dunmng] [uncertain] four morning [newscaste—al 6:05] [uncertain] a m.
