LAW OF JUNGLE" IN BAR
AND PRESS.

The law of the jungle now prevails in
news reporting of court [trials,"]
[uncertain] eat Edwin M. Otterbourg,
president of the New York County
[Lawyert] [uncertain] Association. For
some time ea good) any newspapers hare
been saying that something like the law of
the jungle prevails in the trial of criminal
case.

There is come truth in both statements.
Exceases by newspaper reporters are
worst in the large cities. Not only is just
prevented in some cases, but the dignity of
the courts ia lowered by [(1)] [uncertain]
inaccurate and [pre] [uncertain] Judiced
reporting and [(2)] [uncertain]
overreaching to get the more sensational
aspects of trials involving unique oF
peculiarly [sordut] [uncertain] crimes or
public characters.

This in an honest confession that would
be good fur the sou of a large percentage
of our newspapers. But the bar
[associativna] [uncertain] could do amor
con" fessing on their own account. If you

Crockett Courier — September 3, 1953

have ever ace a certain type of [crimina!] [uncertain] attorney in operation, you know this is true.

Mr. Otterbourg says that the i American Society of [Newspaper Editors] [uncertain] adopted a code to remedy the situation some lime ago, but that nothing has been done." The bar associations have alec adopted some [codes—and] [uncertain] the progress has, at [Icast,] [uncertain] not been terrific.

Maybe the bar and newspaper associations [ahould] [uncertain] get together for 2 little mutual prodding. [It] [uncertain] would at jena serve to center public attention on the [ains] [uncertain] of both [groupe.] [uncertain] And its the public that should be served in the matter, you know [Dallas] [uncertain] News.

THAT FIASCO AVOIDED.

One of the beat editorial commenta- [ries] [uncertain] on the cattle situation recently [lappeared] [uncertain] in the Wichita Eagle. The paper pointed out that cattle prices had improved materially, from the extreme lows that were touched not long ago. And government assist- [ance,] [uncertain] it observed, was limited to such stimulation as helping improve the [cattlemens] [uncertain] credit position, and sup- plying some cheap feed.

Then the Eagle said: But what if the government had, yielded to the loud out-cries for purchasing cattle at parity? Experienced stockmen say the government [woud] [uncertain] hare owned moat of the cattle on the ranges.

There would have followed an" artifi- coal shortage of beef, vastly higher prices, and another fiasco of the price support program.

As for the demands for cattle parity, they were largely politically inspired. It is noteworthy that oe [eatabliahed,] [uncertain] responsible" tatUeman i group ia demanding such slap. [Nevrer, noteven] [uncertain] in the depression thirties, [(have] [uncertain] the cattlemen [saked] [uncertain] supports.

They are fearful of the controls which accompany them.

The whole support program, with accumulating surpluses and [thriking] [uncertain] [marketa,] [uncertain] has raised heavy doubts."

When government uses the taz- payers" money to ald any group, gov emmett will make the policies and du the [boasing—and] [uncertain] In the long, run both producer and consumer will be burt. All of us can profit [frum] [uncertain] the example the cattlemen have been set- ting.
