The Courier editor believes the above

FAILED WITH FOREIGN AID
PROGRAM.

George [B.:] [uncertain] Sokolaky in
Houston [Chronicke.] [uncertain]

When foreign aid was evil to the
American people, it was to promote the
general welfare, national interest [1]

States." These are the phrases which

appear in the report of the committee on
foreign relations presided over [by]]
[uncertain] Senator Arthur Vandenberg.

Crockett Courier — September 10, 1953

He asked) congress to authorize en expenditure ef \$5,300,000,000 for the first of a) four-year operation, The abject was to help European nations to help i themselves to recovery in such a way as to become independent of outside assistance."

This was in 1948 and the foreign aid program is still with us, amount-

ing in this years budget to \$6,400,-900,000 and totaling altogether ap-

The end ts not yet in right. In) fact, the Foreign Operations [Admin-] [uncertain] [iatration,] [uncertain] headed by Harold Stasaen,

[Lhas] [uncertain] been separated from the State Department and seems to have been put on a permanent baals. Maybe foreign aid js permanent, too. When the American [prople] [uncertain] first el agreed to a \$5,300,000,000 [Eurcopesn] [uncertain] recovery program, they never could conceive that the would be such monstrous growth, in time consuming eo large [ahare] [uncertain] of [Ubeir] [uncertain] earnings. But there it is for us to live with.

Genator Vandenberg's report [ine] [uncertain] [cluded] [uncertain] these statements:

This kind of [saststance,] [uncertain] in peace trine, in without precedent in the his- tory of mankind. This assistance s not, and caput be, permanent fea- [ture] [uncertain] of American foreign policy. For

TIME TO TALK [SENSE.] [uncertain]

adds up to the hard [fect] [uncertain] that
the coal industry ls [juat] [uncertain] not

that these critical times require.

It takes lcts of time and lots of money
to develop a modern coal mine.-

Mines cant be turned on and off like
water faucets. If enough mines are closed
down the country can be hurt and the way
you live adversely af- feted. The coal
industry ts working te solve [ita]

millions of dollars for machines that
produce and process coal for less money.
But the savings have been syphoned off

orators will do everything possible to
maintain a strong, healthy industry. [2]
