WE HAVE WITH US A NEW
KING COTTON.

The big story about cotton in the News
Sunday reminds us of the time when
cotton meant everything to Texas. And it
should remind us that, while cotton no
longer means everything to Texas, It
[atill] [uncertain] does mean much. It
always will b A few years ago cotton was
losing rapidly to competing [fibers—both]
[uncertain] synthetics and foreign natural
fibers.

[Cotton] [uncertain] was badly behind
In the world race toward cheaper
production through scientific and
[mechanics]] [uncertain] methods. There
ware many who be- [lieved] [uncertain]
that cottons day was done.

But cotton has come back. During the
last [ycar] [uncertain] the consumption of
cot- ton gained in relation to the consump-
[tion] [uncertain] of [synthetica.]
[uncertain] It is o rvvolution- [ized]
[uncertain] cotton industry, including
plent- ing, harvesting, marketing,
manufac- turing and [eelling.] [uncertain]
It is demanstrat- fog that cotton is still the
best all- tend fiber In the world.

For many centuries cotton fiber had so
little competition that its qual- [fthes]
[uncertain] were taken for granted Its
market was eo nearly universal that

living out ef cotton and cotfon' products
hare learned how to grow it, grade it and
sell it, and process it by methods that are
in step with the advanced world in which
they live.

Texas has lived up to its responsi-
bility as the biggest cotton state by
making big contribution to cottons

A LOOK AT THE NEW
AMERICAN.

The picture of the average American as
a bigway-happy worshipper of a [ahiny]
[uncertain] new automobile [Is]
[uncertain] sadly put of date, [pointe oul]
[uncertain] Economist Fenton B. Turck.

Americans are still buying motor cars,
but [nly] [uncertain] at a modest 10 per
cent greater than a decade ago.

By contrast, Americans spent more
dollars to go to classical music con-

certs than to baseball games, 96 per
cent more dollars for books than they did
a decade age. More Bibles were purchased
[between 194]] [uncertain] and 1951 than
were bought In the previous forty years,

Personal expenditures for the legiti-
mate theater and opera are up 85 per cent
In the 10-year [peried.] [uncertain]

Crockett Courier — October 1, 1953

Attrndat [cancerta] [uncertain] of serious music jumped [BS] [uncertain] per cent. Amerceans spent 140 per cent more for toys and [aporta] [uncertain] equipment, [219] [uncertain] per cent more for photo developing and printing, 129 per cent more for flowers and [sceds.] [uncertain] 263 par cent more for phonographs and records, musical instruments, radios and television acts. Sales of classical records now j' account for 40 per rent of the total.

Forty-five per cent more Americans were graduated from colleges in 1948 than 1940. In 1951, the year after the GI surge subsided, 22 per [cent]! [uncertain] more Americans were enrolled in [in-}stitutions] [uncertain] of higher learning [than] [uncertain]

1940. Americans [epent] [uncertain] 104 per cent more for higher education, elementary and [scondary] [uncertain] schools and 261 per cent more for commercial and trade

For the first time in history, more

Americans [(54) [uncertain] per cent) own their own homes than pay rent lome-owners [apent] [uncertain] three times as much for hame decoration.

The quality of home furnishings design, of the very pictures on the [walle] [uncertain] in [todays modeat] [uncertain] homes trum- pets a revolution in American taste.

The [srerage familys] [uncertain] improved diet produced children two to three inches [tatler] [uncertain] than fifty years ago, twenty years have been added to the life ex- [pectancy.] [uncertain] The food cost the family less than half the [percentage] [uncertain] of its income spent in 1900,

By now you begin to get the pic:

[ture] [uncertain] of an American who can live and work harder and longer, of bouk-reading, garden-tilling, apor- loving American, who likes music and takes times for hobbies.

LOOKING FOR [BURINESS.] [uncertain]

In spite of today high prices, many enterprises are earning smaller net incomes than used to be [tbe] [uncertain] case. This ls largely the [rrault]

[uncertain] of two [factors—] [uncertain] extremely heavy operating costs, and

Intense competition among both pro- [ducers] [uncertain] and distributors for the pub- lies patronage. The result is described in these words by the mags- tine Printers Ink: Few things inter- eat Lop management more these days than how to increase sales. New mar- acts, better saturation of old markets, new products, better packaging and merchandising of old ones, premium offers, special sales, improved red:

acts, price cuts."

Printers Ink was speaking primis- [rily] [uncertain] of manufacturers. The same thing is true of retailing. The time when merchant could [sel!] [uncertain] practically anything by just putting it on display hes passed. Supply be equal to of greater than demand In practically every field. In short, buyers" mar- i [ket existsa—which] [uncertain] means every elope, ti from the smallest independent to the biggest national chain, must concen- [I] [uncertain] trade day in and day out on trying yj to offer the fickle consumer lower price, a better product, or some other inducement

This is one of the hallmarks of a
