shoo of [cangress] [uncertain] to
[act—Dalles] [uncertain] re BY PAUL
CRUME pe Homat Leonard, the former
speaker of the Texas house, was telling
about his experiences during the week-end
of the [Texas-Oklahoma] [uncertain]
game in a hotel room separated from the
next one by a door that was too thin. The
man next door seemed to have plenty of
friends and a limitless supply of whisky.

He seemed like a [rea!] [uncertain]
good guy," paid Levnard.

As the night [progreased,] [uncertain]
more and more friends dropped by to see
the man-and stayed on and on. They sang.
They guffawed. They got pretty loud in
their talk. Leonard found It impossible to
sleep. Finally, at gray morning, the last of
the vis- [iters] [uncertain] departed.
Leonard heard the man in the next room
fall across the

CATTLE MARKET STEADIES i

Charles Locey, a [Scrippe-Heward]
[uncertain] staff writer, recently sent out

Crockett Courier — November 5, 1953

dispatch on the changing cattle [aituathon.] [uncertain] During a recent period, he wrote, [Theyve] [uncertain] poured the biggest flood of cattle in pears into the Chi- [cago sateckyards;] [uncertain] and yet a market, that had been rum ragged only [a}!] [uncertain] couple of month age, took it [witheat!] [uncertain] buckling.

Farmers who took terrible beating in mid-eummera heat and drought, and feeders of fat cattle who got squeezed between high corn) prices and low cattle prices, ava perked up and [beginolog] [uncertain] to show [conf}. dence] [uncertain] again.

Predicting markets ahead Is al- ways risky business, but moat people around the stockyards say they think prices should bold fairly mica."

Beef prices in general [bmve im-] [uncertain] proved moderately from the [lows]] [uncertain] reached last summer. But they are still much below the highs of a year) [aro,] [uncertain] and the consumer gets [aubstan-] tially] [uncertain] more for his money when [be] [uncertain] fora Lo the butcher shop. [Moreorer,]] [uncertain] it is definitely in the long-term [ln-} terest] [uncertain] of the consumer no jess than the producer that the value of [beef]] [uncertain] return to and stay at a reasonable level, which will [compenaste] [uncertain] for to days cost of raising the animals [and}] [uncertain] return some kind of profit [This]] [uncertain] is meat-cating country, and a [stéa-] [uncertain] dy increase in the meat supply is essential if we are to maintain our) living standards in this regard. And its obvious that, Instead of increased) supply, wed soon have sharp de-) crease if it became apparent that the meat [businces,] [uncertain] with all [ite] [uncertain] work and risks and investment..was a losing enterprise.

So the recent news from the meat front is on the [guod alde.] [uncertain] May St continue that way.

ANIMAL HEALTH j Failure to keep cattle out of orchard, corn fields and gardens after the fall harvest may result in costly [luasea] [uncertain] from choke," the American Foundation for Anima) Health says.

Foundation officials said choke" was not uncommon in cattle because they naturally swallow food the first time without chewing it much. Ear born, potatoes, cabbage, bests and apples were listed by the Foundation a2 common causes of the condition

Regardless of the cause, drooling and bloat may be the first symptoms when a cow is choking." the founda- [tion sald.] [uncertain] Affected [cowa] [uncertain] also often bold their beads Jow with necks stretched out, while coughing, gasp- ing, and open mouth breathing also are [commen] [uncertain] indications of the problem."

Affected animals will make no attempt to cat or drink. Slace similar [symplome] [uncertain] may be shown also cat affected with rabies, bloat, [bronchitls,] [uncertain] wooden tongue and ether diseases, an immediate diagnosis is necessary to determine the trouble, the [foundsticn] [uncertain] said.

Fallure to obtain competent ald immediately may be costly," officials [aaid,] [uncertain] because badly choked cattle are Ilkely to die of bloat within a short time."

Veterinarians may use drugs to relax the throat muscles of the cow no that the offending object may be [remoured] [uncertain] more easily. In other cases, instruments may be used to obtain relief. Bometimes surgery Is needed in extreme emergencies to relieve the bloating, the foundation said.

One of the best examples of dictation by Washington occurred in [Indiana] [uncertain] in 1947, in connection with federal regulation which forbade public Inspection of state relief rolls. The regulation meant that only a few [ofificals] [uncertain] end social workers knew [whe] [uncertain] was on relief. Indiana objected to the secrecy" provision, but Oscar Ewing,

s Garage For

WORK XCHANGE BORING

[T] [uncertain] GRINDING

AN NORMAN Crankshaft a better job for you.

g Garage

Highway

CROCKETT COURIER:

then Federal Security administrator, threatened te cut off federal ald if the provision was violated. The Indiana legislature ruled, nevertheless, that welfare [rolla] [uncertain] Le opened for public [inapection,] [uncertain] and congress passed a law [opholiing] [uncertain] Indiana. Mr, Ewing was overruled, but it took an act of congress to do so. [locidentally,] [uncertain] when [Indianes.tclief] [uncertain] rolls were opened for inspection, the number of relief [reciplents] [uncertain] dropped sharply, Since the, Louisiana and [Flerida] [uncertain] have opened [thlrr] [uncertain] relief rolls to [inapection.] [uncertain]

3-D TAXATION.

The Chamber of Commerce of the

United States recently [peinted cvt,] [uncertain] in statement prepared for the [Ticuse] [uncertain] Ways and Means committee, that while 3-D is the newest thing in Hollywood its an old story to millions [eof] [uncertain] American [larpayers.] [uncertain]

These [taxpayrra] [uncertain] are [investors—the] [uncertain] people who put part of their savings in the stocks of corporations and thus make possible employment for tens ef millions of other people, as well as themselves, and keep the vast economic machine running.

Heres bow 3-D taxation works First, the Investor must pay a [taz] [uncertain] on whatever he [earns—which] [uncertain] includes the money he later uses to buy [hia] [uncertain] stock. Second, the corporation in which he invests must pay ao tax on its earnings before it can pay bim any dividends. Third, whatever be gets In the way of dividends ts taxed again. In short, the investor pays income tax on taped dividends of taxed [sarings!] [uncertain]

That the ls s gross injustice to Investors goes without saying. But the investors interest a the [amallest] [uncertain] factor [invotved,] [uncertain] In the long run, the main sufferers from such punitive tan

Crockett Courier — November 5, 1953

policies are the American people as [arwbole.] [uncertain] For when we discourage investment in enterprise, we discourage industrial expansion and progress and [erersting] [uncertain] which makes for more and [betric] [uncertain] job, and higher living [standarde] [uncertain] for us [al]. Thats [uncertain] why 3-D taxation is problem that affect everyone.

SAFETY HAS TO BE EARNED.

A short time ago three American railroads were given the coveted E. Martin [Memorial] [uncertain] Gold Medal awards for the best safety records for 1952, and eleven others were presented with [certificates] [uncertain] of common: [dation.] [uncertain] This served to highlight the amazing safety record [established] [uncertain] last year by the railroad industry as whole.

Here [arv] [uncertain] some of the achievements" Not a [singl] [uncertain] railroad passenger lost his life in a train collision or derail- [ment.] [uncertain] Passenger fatalities from [Lalle] [uncertain] from trains and the like were fewer in [number] [uncertain] and in frequency [thes] [uncertain] in any other year of record Fewer employees were fatally injured than in any of the preceding 64 years for which [statistics] [uncertain] are [available.] [uncertain] The number of fatalities due to highway grade crossing accidents was the [occ: ond] [uncertain] lowest for the past 35 years. Even [statistics] [uncertain] to trespassers illegally riding the trains or walking the tracks hit new low.

How and why did all this happen? Obviously, it was just because the gods of chance [amiled] [uncertain] on the railroads. In [railroading] [uncertain] as in most other things, safety usually has to be earned. Some 60 years ago the railroads launched an intensive organized safety program, and it has [peld] [uncertain] off handsomely. Better equipment, better [systems] [uncertain] of control, day in and day out training of [employees—these] [uncertain] are the kind of factors that have made the railroad almost [unhappily] [uncertain] safe.

GUARANTEED FOR WHAT?

Some of the major labor [unions] [uncertain] are now pressing for a [guaranteed] [uncertain] annual wage for workers. Without going in- to the pros and cons of this long-debated idea, we pronounce recently made by [Gece.] [uncertain] A. [Horne] [uncertain] Company, which was a pioneer in [adopting] [uncertain] wage stabilization policies, [should] [uncertain] be kept firmly in mind by all concerned. It said, in part: Certainly our company is wholly unable to redeem the money consideration in such guarantee unless we can keep our people actually and profitably employed. The entire asset value of our company, [cash] [uncertain] everything we own, would only be [sufficient] [uncertain] to redeem a ten months' guarantee. So, when using the phrase "guaranteed annual wage," we must ask the [question—guaranteed] [uncertain] by what? The only guarantee we know of is the ability of management to manage coupled with willingness of workers to work. If either fails, then the [guarantee] [uncertain] falls."

That is [simply] [uncertain] common [sense—bat] [uncertain] common sense seems to be something of a rarity these days. It is obvious that labor-management group could frame and sign contracts [guaranteeing™] [uncertain] wages of any amount for any period of time. But the contract [will] [uncertain] not be worth the paper it is written on unless the company can sell sufficient goods at a profitable price to make [possible] [uncertain] its fulfillment.

Last June congress set up a [commission] [uncertain] on intergovernmental relations. The commission [must] [uncertain] decide which activities now carried on by Washington rightly belong to the state and [local governmenta.] [uncertain] Then

[illegible or non-text passage omitted — see scan]

it will decide what takes Washington can give up to enable the [states] [uncertain] and communities to pay for these activities. The commission will submit its recommendations to congress

and! President Eisenhower next March These [recommendations] [uncertain] could lead to legislation restoring many [responsibilities] [uncertain] to state and local governments.

IN TWENTY YEARS.

The October issue of the American Mercury features an article by Paul L. Martin, chief of the Washington Bureau of the Gannett newspapers, which is of direct [personal] [uncertain] interest to every [citizen.] [uncertain] It deals with government spending during the 20 years which have just ended. Here are few of the many [facts] [uncertain] he retards:

In [these 20] [uncertain] years, the government spent more than [774,000,000,000] [uncertain] and ran up a net deficit of more than \$239,000,000,000. In other words, it spent almost half again as much as it [was] [uncertain] able to collect, despite ever increasing taxes.

At the end of [fiscal] [uncertain] 1953, the [national] [uncertain] debt amounted to fraction less than 180 for each American. Now the figure is above 2,000.

In 1923, a typical family with \$4,000 year income [paid] [uncertain] \$44 in federal [income taxes—now] [uncertain] it must pay close to \$500.

In the last fiscal year, tax collections were 2,100 per cent greater than in 1933

Read those figures again. Then answer this question: How long can any nation stand on such a trend without going bankrupt?

HONORABLE EXCEPTION,

One reason for [the] [uncertain] incredible cost of [government] [uncertain] is that [too] [uncertain] many of us went [recomm] [uncertain] for the other fellow [only—and] [uncertain] never in matters that affects us.

[Until] [uncertain] there are [honorable exceptions] [uncertain] and they deserve recognition. A [short time] [uncertain] ago the forest service merged [the] [uncertain] Hailey, [Joabo] [uncertain] headquarters with that of Twin Falls in order to save \$16,000 a year. It might have been expected that Hailey people would howl in protest. But that was the case

Crockett Courier — November 5, 1953

The Halley Times said: Naturally we don't like to sour eur [Perest pervice] [uncertain] headquarters but the fantastic cost of government [can}] [uncertain] be [keeered] [uncertain] without some sacrifices. Perhaps a eating of \$15,000 annually looks keas than a [pinbead;} [uncertain] but fire such mergers made recently adds up to [7bL00] [uncertain] annuals Muluply such
